Board of County Commissioners

Date of Meeting: June 8, 2004

Date Submitted: June 3, 2004

To: Honorable Chairman and Members of the Board

From: Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

Subject: Preliminary FY 2004/2005 Budget Workshop

Statement of Issue:

To seek policy guidance from the Board regarding the development of the tentative FY 2004/2005 Budget and 5 Year Capital Improvement Program (CIP).

Background:

As part of the annual budget process, County staff is seeking policy guidance from the Board regarding the development of the tentative FY 2004 / 2005 and 5 Year Capital Improvement Program (CIP). County staff has developed preliminary revenue forecasts and planned appropriations. Per Board direction, a number of issues have been reviewed and are presented as separate budget discussion items.

This workshop is a preliminary step in the overall budget development process. The Board will hold its formal budget workshop on July 27th (and July 28th if necessary). The July workshop involves all the Constitutional Officers and departments and agencies. In addition to the workshop, at the July 27th meeting, the Board will conduct a Citizen public hearing to seek input into the budget process. Finally, in late September, the Board will conduct the final two budget hearings required per Florida Statute.

Analysis:

1. Budget Discussion Items

Table 1 summarizes the budget discussion items being presented to the Board of County Commissioners. At this point in the budget process a number of the items are recommended for funding. Other items have not been recommended for funding.

Date: June 8th, 2004

Page: 2

Table 1: Summary of Budget Discussion Items

	sion Item	Included in	Not included in
		Preliminary	Preliminary
		Budget	Budget
1.	FY04/05 Pay Increases for Full-Time Career Service Employees	\$208,790	
2.	Commissioner's Travel Budget	6,000	
3.	Increased Litigation Related Funding	1,200,000	500,000
4.	Midyear Funding Requests	15,000	
5.	Support for Laura Lee Boys & Girls Club Facility	200,000	
6.	Support for the Riley House – Lake Hall School Acquisition and	105,000	
	Restoration Project		
7.	Evaluation of the Need for a Women's Healthcare Center	60,000	
8.	Funding for Healthy Start Program's Fetal and Infant Mortality	17,600

9.	Funding for Recreation Councils and Community Center Boards to	32,000	
	Provide Public Recreation Programs		
10.	Increased Funding Requests - Existing Permanent Line Item	160,176	
	Agencies		
11.	Increased Funding for Summer Youth Employment Program	25,000	
12.	Increased Funding for Community Health Services Partnership	61,000	
	(CHSP)		
13.	Increased Funding request for Guardian Ad Litem		55,000
Total I	Expenditures	\$2,090,566	\$555,000
14.	Establishment of Tipping Fee for the Electronics Recycling Program		
15.	Funding Alternatives for Mosquito Control's Hand-Fogging Program		
16.	Update on Article V/Revision 7		
17.	Funding Issues for Growth and Environmental Management		
	Concerning the Permitting Level of Service and Special Project		
	Assignments		

2. FY 2005 General Fund Contingency

The preliminary FY 2004/2005 budget funds \$524,947 in the General Fund Contingency. This reflects approximately a \$50,000 increase over the FY 2003/2004 adopted amount of \$474,947. Traditionally, the Board has used previous increases of this nature to restore issues not funded in the preliminary budget.

3. Preliminary Revenue Forecast

Table 2 shows the anticipated major revenue collections for FY 2005. The table includes general revenues and special revenues that receive general revenue support (i.e. Growth and Environmental Management and Probation). Per preliminary estimates from the Property Appraiser, Ad Valorem growth will be 8.79% over FY 2004. For budgeting purposes, the aggregate overall revenue growth for these revenues is 5.81%. This compares to a 5.23% increase experienced last budget year.

Date: June 8th, 2004

Page: 3

Table 2: General Revenues or Restricted Revenues supplemented by General Revenues

		FY 2003 Budget	FY 2004 Budget	FY 2005 Budget	% Variance

4. Low Income Senior Exemption

Based on preliminary taxable value estimates, anticipated County revenues will be impacted by the low income senior exemption which is estimated at \$398,014 in reduced ad valorem revenue for FY 2004/2005.

5. Preliminary Expenditure Plan

A detailed table illustrating the preliminary budget by department and agency is included attachment #1. Table 3 below summarizes this attachment.

Date: June 8th, 2004

Page: 4

Table 3: Program / Agency Expenditure Summary

1	Logislative / Administration	Adopted (b)	Preliminary (c)	(d) 7.72%
	Department / Agency (a)	FY 2003/2004	FY 2004/2005	% Change

6. Increased Costs in Maintenance of Base Budget

The budget includes significant cost increases in employee benefits. Employer contributions for life and health care costs are anticipated to increase \$1.2 million. This is equal to a 12.22% increase over the FY 2004 base budget. Employer contributions to the Florida Retirement System are anticipated to rise by 14.18% equal to an additional \$879,000 in base funding.

7. Budget Issues

Attachment #2 reflects all requested and recommended program changes included in the preliminary budget. This attachment also displays all new position requests and recommendations. The following list provides a brief highlight of issues included in the FY 2004/2005 preliminary budget.

- No changes to the Countywide Millage Rate
- No changes to the EMS MSTU Millage Rate
- \$60,000 in funding for Evaluation Study of Women's Health Care Clinic and an additional

Date: June 8th, 2004

Page: 5

\$1,000,000, with a corresponding 0.1000 increase in the Primary Health Care MSTU Millage Rate, to support funding of a future Women's Clinic (Discussion Item)

- \$100,000 for the Military Personnel Grant Program
- Career Service Employee raises of the minimum of 5% or \$1,000 and the potential for onetime merit bonuses of \$400 or \$600
- Implementation of Career Service and Management Services Pay Plan Adjustment
- Third year of funding to implement the Sheriff Compensation study
- \$1.2 million in funding for additional litigation expenses for County Attorney (Discussion Item)
- \$17, 600 in additional funding for Healthy Start Program (Discussion Item)
- Funding for the implementation of new fee study for G.E.M.
- Funding for enhanced West Nile Virus Resources
- Funding for 4 new Communications Officers for the Sheriff / EMS
- \$200,000 in funding for the Boys and Girls Club (Discussion Item)
- \$105,000 in funding for the Riley House Lake Hall School Renovation (Discussion Item)
- Funding for the French Town/Southside TIF payment
- Funding for the Downtown TIF payment
- Funding for the Lake Carolyn Home Owners Association Settlement

There were 25.25 positions requested as a part of the budget process. The positions recommended for funding support public safety needs, the implementation of Article V / Revision 7, or other areas of critical need. Table 4 summarizes the position changes currently recommended.

Table 4: Preliminary Position Recommendations

Department / Agency	Positions
Management Information Services	1.0 FTE Network Systems Administrator to aid in
	Countywide efforts to comply with Article V / Revision 7
Solid Waste – Recycling	1.0 FTE Recycling Assistant (Position is proposed to be
	supported through tipping fees)
Sub-Total Board	2.0 FTEs
Sheriff – Law Enforcement	4.0 FTEs Communications Officers in support of the
	EMS Department (funding for positions supplemented by
	EMS funds)
	1.0 FTE Speed Enforcement Officer (previously grant
	funded, required to continue funding once grant ends)
Property Appraiser	4.0 FTEs Est. (Budget not submitted until 6/1/04)
Supervisor of Elections	1.0 FTE Elections Records Specialist
	1.0 FTEs Voting Systems Specialist
Sub-Total Constitutional Officers	11.0 FTEs
Total FTEs	13.0 FTEs

8. Capital Improvement Projects

Date: June 8th, 2004

Page: 6

The following provides a brief summary by highlighting the preliminary capital budget. Attachment #3 shows all capital project requests and recommendations.

Libraries

• Continued funding for the construction of the Apalachee Parkway (\$620,275) and Lake Jackson Branch (\$1,501,225) Libraries

Parks and Recreation:

- Funding or planned funding for the following parks include: Alford Arm Park, Apalachee Parkway Regional Park, Jackson View Park, and Northeast Community Park.
- Fort Braden Community Center, Lake Jackson Community Center, and Miccosukee Community Center.
- Capital Cascades Greenway, Miccosukee Greenway, and St. Mark's Headwaters.

Facilities Management:

• Continued funding for common area furnishings, courtroom renovations, countywide ADA. New projects include the energy performance contract, partial roof replacement for the jail, uninterruptible power supply for MIS data, and Mosquito Control's security fencing.

Public Works- Engineering/Transportation:

- Continued funding for arterial and collector road resurfacing, community safety and mobility, FDOT permitting fees, and intersection and safety improvements.
- Major funding anticipated for the following projects: Bannerman Road, Chaires Cross Road, Heatherwood Road, Kerry Forest Parkway Extension, Lafayette Street, Mahan Drive, and Tharpe Street.

Public Works- Engineering Services/ Stormwater:

- Continued funding for flooded property acquisition.
- Major projects include: Harbinwood Estates Drainage, Killearn Acres flood mitigation, Killearn Lakes sewer project, Lafayette street stormwater, Lakeview Bridge, and Okeeheepkee/Woodmont Pond.

Public Works- Operations:

- Continued funding for guardrail installation, Miccosukee road complex, and OGCM stabilization.
- Funding or planned funding for arterial and collector roads pavement markings, and enhanced right of way maintenance.

Public Works- Solid Waste:

• Continued funding provided for equipment replacement.

Date: June 8th, 2004

Page: 7

Public Works- Mosquito Control:

• Future funding planned for the following projects: aerial Larviciding unit, hydro mulching machine, ½ ton truck, 1 ton truck, 4x4 truck with ULV fogging unit, six-inch pump and pipe, and stormwater filter repair equipment.

Management Information Systems:

- Continued funding for the following projects: courthouse data wiring, digital phone system, electronic document management, geographic information systems, Hansen work order management, internet related projects, jail management information system, JIS data warehouse, technology in courtrooms, and user computer, file server, network backbone upgrades.
- New funding provided for the following projects: disaster recovery, facilities technology request, incremental basemap update, Growth Management technology request, and MIS security.

Administration/Other:

• New funding will be provided for the following projects: ADA voting system equipment, EMS equipment, replacement mobile data computers for the Sheriff's Office.

9. Use of Fund Balance

The preliminary FY 2004/2005 budget contemplates using a portion of the unreserved fund balance for non-recurring (one-time) expenditures that are reflected below in Table 5.

Table 5: Use of Fund Balance

Fund Balance Allocation	Amount
Library Construction	\$1,501,225
Sheriff's Mobile Data Computers	588,000

Date: June 8th, 2004

Page: 8

10. Permanent Line Item Funding

Table 6 reflects funding requests and preliminary recommendations for the permanent line item funded agencies.

Table 6: Line Item Funding

Agency	Request	Recommended	Increase
Apalachee Regional Planning Council	\$5,000	\$5,000	
Keep Tallahassee/Leon County Beautiful	15,000	15,000

Local Arts Agency Program	165,000	165,000	40,000
Celebrate America	2,500	2,500	
Dr. MLK Celebration	2,000	2,000	
Total	\$1,151,812	\$1,151,812	\$160,176

^{*} Additional \$110,000 related to Article V funded through Court Fees

11. County Survey

The Office of management and Budget conducted a survey of the 66 Florida Counties relating to budget, ad valorem and staffing. 57 out of the 66 Counties responded; the results of this survey are displayed on Attachment #4. The following are highlights of the survey:

- Leon County has the 8th lowest net budget per capita; and lowest within the comparable and surrounding Counties.
- Leon County has the 17th lowest staff per capita; and third lowest within the comparable Counties and lowest within surrounding Counties.
- Leon County has approximately 43% of its property tax base exempt from taxation which ranks 22nd highest over all Counties and 2nd most within the comparable Counties and 4th most within the surrounding Counties.

Options:

- 1. Accept staff's report
- 2. Do not accept staff's report
- 3. Board Direction.

Recommendation:

^{**} Includes \$150,000 for the Mary Brogran Museum and \$60,000 for the Tallahassee Museum of History and Science

Workshop Item: Preliminary FY 2004/2005 Budget Workshop Date: June $8^{\rm th}$, 2004

Board of County Commissioners

Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

To:

Honorable Chairman and Members of the Board

From:

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

Subject:

FY04/05 Pay Increases for Full-Time Career Service Employees

Statement of Issue:

This item discusses the recommended pay adjustment for full-time career service employees for FY04/05.

Background:

As part of the development of the annual budget the County determines what the pay adjustment will be for the subsequent budget year. In FY03/04, the Board approved giving all full-time career service employees a pay increase in an amount equal to the greater of 4% or \$1,000 and the opportunity for a one-time \$400 to \$600 merit adjustment.

Analysis:

The current proposed FY04/05 budget is contemplated utilizing the greater of 5% or \$1,000 in pay adjustments for full-time career service employees. In addition to the pay increase, included in the budget is funding for the one-time \$400-\$600 merit adjustment that is available to full-time career service employees. The dollar impact for all funds to the County for the FY04/05 would be approximately a \$208,790 increase over last year.

Options:

- 1. Approve the inclusion in the FY04/05 budget for all full-time career service employees a pay increase in an amount equal to the greater of 5% or \$1,000 on October 1, 2004.
- 2. Approve the inclusion of a pay increase at an amount to be determined by the Board.
- 3. Board Direction.

Recommendation:

Option #1, the greater of a 5% or \$1,000 raise for all full-time career service employees on October 1, 2004 is included in the tentative FY04/05 budget.

Board of County Commissioners Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

To:

Honorable Chairman and Members of the Board

From:

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

Subject

Commissioner's Travel Budget

Statement of Issue:

This item discusses additional funding associated with Commissioners serving on Florida Association of Counties (FAC) or National Association of Counties (NACO) Boards.

Background:

The FY03/04 Budget included \$3,000 in funding associated with Commissioners serving on either the Florida Association of Counties (FAC) or National Association of Counties (NACO) Boards. This funding was necessary for travel to national or state meetings. The appropriation was in addition to the Commissioner's normal budget, but was restricted for the above stated purposes.

Analysis:

As part of the development of the FY04/05 Proposed Budget staff is seeking Board's approval to increase Commissioner Thaell's and Commissioner Maloy's travel budget by \$3,000. Commissioner Thaell will serve as President to the Florida Association of Counties (FAC) as of June 23, 2004. As a result it is necessary to include the historic level of funding for Commissioner Thaell's budget for FY04/05 for related travel.

Commissioner Maloy serves as a board member of FAC in accordance to the FAC bylaws which states that former Presidents of FAC (as long as they serve in the capacity of a County Commissioner) serve as a member of the FAC board. As a result it is necessary to include the historic level of funding for to Commissioner Maloy's budget for FY03/04 for related travel.

Options:

- 1. Approve the inclusion \$6,000 in the appropriate Commissioners' budget (\$3,000 for Commissioner Thaell and \$3,000 for Commissioner Maloy) for travel associated with FAC Board activities.
- 2. Fund each Commissioner at an amount to be determined by the Board.
- 3. Do not fund additional Commissioner travel costs.

Recommendation:

Option #1, the additional \$6,000 is included in the tentative budget.

Board of County Commissioners

Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

TO:

Honorable Chairman and Members of the Board

FROM:

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

SUBJECT:

Increased Litigation Related Funding

Statement of Issue:

This item seeks Board consideration to increase the County's litigation funding by \$1,200,000 in the FY 04/05 budget.

Background:

As reflected in Attachment 1, as part of the FY04/05 budget process the County Attorney submitted a request for increased litigation funding of \$1,700,000.

Analysis:

The County Attorney has identified a number of outstanding litigation matters that may require additional funding during FY04/05. The following table summarizes the request.

	FY04/05	FY05/06
Cairo, GA	\$ 300,000	\$ 75,000
TMDL - current issues	\$ 450,000	\$ 75,000
TMDL - background investigation new bas	sins \$ 100,000	
Decatur Dam Issue	\$ 250,000	
Environmental Permitting	\$ 100,000	
Wakulla County Comp. Plan	\$ 100,000	
Killearn Lakes Septic Tank Appeals	\$ 50,000	
Eastern Transmission Line	\$ 150,000	
Chaires gate station	\$ 100,000	
On-going matters (Fallschase, Article V, e	etc.) <u>\$ 100,000</u>	\$ 100,000
Subtotal	\$ 1,700,000	\$ 250,000
FY03/04 Adopted Budget *	\$ 300,000	\$ 300,000
Total	\$ 2,000,000	\$ 550,000

^{*} The Board supplemented the FY03/04 by \$525,000 for TMDL and Cairo, GA to make the current funding \$825,000.

Budget Discussion Item: Increased Litigation Related Funding

June 8, 2004

Page 2

As reflected in the above list, there a number of matters that may or may not move towards full litigation. It is difficult to determine with certainty what the actual fiscal impact of all of the pending matters may ultimately cost Leon County. For purposes of preparing the FY04/05 budget, \$1,200,000 in additional funds have been included to support the County Attorney's request. The total funding for professional services including the existing base is \$1,500,000.

OPTIONS:

- 1. Direct staff to include the additional litigation funding of \$1,200,000 in the FY04/05 budget for total litigation related funding of \$1,500,000.
- 2. Direct staff to include a different amount for increased litigation funding in the FY04/05 budget.
- 3. Board Direction

RECOMMENDATIONS:

Option #1, an additional \$1,200,000 is included in the tentative budget.

BOARD OF COUNTY COMMISSIONERS MEMORANDUM REVISED

To:

Parwez Alam, County Administrator

Alan Rosenzweig, Director of the Office of Management and Budget

From:

Herbert W.A. Thiele

County Attorney

Date:

May 14, 2004

Re:

Fiscal year 2004-2005 Budget for Litigation Related Matters

This memorandum follows up on our meeting with representatives of the County Administrator's Office, the Office of Management and Budget, Public Works, Management Services, and Growth & Environmental Management on Thursday, April 8, 2004, regarding our concerns over the escalating costs of currently pending or anticipated projects and litigation for the current and upcoming fiscal year(s).

As you know, based upon the then-pending matters in litigation and other anticipated projects, when the budget for the County Attorney's Office was formulated in April 2003, we believed that a reduction in the professional services line item from \$400,000 to \$300,000 was warranted, given the anticipated expenses. However, subsequent to the adoption of the budget by the Board of County Commissioners in September 2003, the Board has authorized and directed additional substantial litigation activities, which were not anticipated in the budget.

Although we had indicated to the Board by separate memorandum (copy attached) dated September 18, 2003, an anticipated cost of approximately \$250,000 for the potential litigation with the City of Cairo, Georgia, the extent of our involvement in that project, as well as the new project involving the Department of Environmental Protection and EPA's permitting for Total Maximum Daily Loads (TMDLs) under the Clean Water Act, may well exceed that preliminary number. Further, the TMDL project has led to significant additional expenditures for outside consultants, testing, and attorneys' fees. As a result, the Board authorized an additional \$650,000 in January 2004, some of which was utilized to provide additional professional services funding, and some of which was utilized to provide additional staffing for the Public Works Department for purposes of resolving the TMDL issues.

As you know, both of these issues continue at the present time, and we do not believe that the matters will be concluded before the end of this, or even the following, fiscal year.

Parwez Alam, County Administrator
Alan Rosenzweig, Director of the Office of Management and Budget
Page 2 of 3
May 14, 2004

With that in mind, we believe that County Administration should consider the sum of approximately \$300,000 to complete the Cairo trial court level litigation issue in fiscal year 2004-2005, and if an appeal is taken by either of the parties, an additional \$75,000 in fiscal year 2005-2006.

With regard to the current TMDL matter, assuming that it is not settled amicably between the parties during this fiscal year, we believe that the complete litigation of this matter (including expert witnesses and consultants) could cost the County as much as \$450,000 additional dollars in Fiscal Year 2004-2005, and if an appeal is taken, an additional \$75,000 in Fiscal Year 2006.

Further, there has been substantial discussion by some Commissioners about having the County become involved in the permitting of the proposed landfill in Decatur County, Georgia, the permitting of the dam on the Ochlocknee River in Grady County, Georgia, and an investigation into other potential point-source pollutants along the Ochlocknee and its tributaries in the southern part of Georgia. To fully and completely investigate these issues and commence our involvement, if authorized by the Board of County Commissioners, we believe an additional \$250,000 will be needed, even without litigating any of these.

We also believe that the TMDL process will continue for many years ahead, with the next potential basin being Lake Munson. We believe that funding should be provided in a budget (whether it be the County Attorney's Office or the Public Works Department) to do background investigation and testing in preparation for the new TMDL in the next basin. The sum that we believe would be appropriate to fund in the next fiscal year would be \$100,000.

It is also our belief that if the Community Redevelopment Area issue is not settled with the City of Tallahassee in the coming weeks this fiscal year, then the County should anticipate spending another \$100,000 on this matter.

While the Board of County Commissioners originally "froze" certain funding for the defense of the Dobson v. Leon County and Maloy v. Board of County Commissioners attorneys' fees litigation, monies in anticipation of a potential award in that case should be placed into the reserve funds. As you know, we have actual litigation pending in the amount of \$338,836.98 in the Dobson v. Leon County case and \$139,008.30 from Bruce Minnick, Esq., in the Maloy v. Board of County Commissioners case, as well as "claims" from both Mark Herron, Esq., in the amount of \$2,733.09, and Messer, Caparello & Self, P.A., in the amount of \$51,208.67 and Rick Bateman, Esq., in the amount of \$77,000 which are currently in the claims stage.

We also anticipate that the litigation involving the environmental permitting on two parcels within the County may come to trial in the next fiscal year, in which case expert witnesses and consultants will be needed to testify about the ongoing activities. We believe this should be funded at a level of at least \$100,000.

Page 3 of 3
May 14, 2004

While we are engaged in settlement discussions on the Wakulla County comprehensive plan matter, we are not optimistic that the current settlement discussions will come to fruition. That being the case, the matter will need to be litigated at the Division of Administrative Hearings (and a potential appeal taken), in which case additional expert witnesses will be needed to opine on transportation impact issues as well as planning issues, for which \$80,000 to \$100,000 will be necessary.

The Killearn Lakes Septic Tank Appeals have now been transferred for trial to the Division of Administrative Hearings. Should this trial take place in the current fiscal year, as we anticipate, we will need to retain experts for testimony to support the position of the Department of Health. This would amount to approximately \$50,000.

The Board of County Commissioners has also authorized and directed the County to become involved in challenges to the City of Tallahassee's proposed Eastern Transmission Line, for which we believe costs for expert witnesses alone may approach \$150,000. To file a complaint with the Office of Pipeline Safety regarding the Chaires "gate station," for which we believe expert testimony will also be needed, the amount could exceed \$100,000.

Finally, we also should bring to your attention that there are also other pending matters that may arise in the next fiscal year, including the issues of permitting with regard to the Fallschase DRI, Article V litigation that is being contemplated by some counties, as well as expenses related to other ongoing litigation matters for which the usual professional services line item of \$400,000 must be included.

We bring all of these issues to your attention so that further discussion may be had by the Board of County Commissioners regarding the costs associated with pursuing these matters, and so that specific monies can be set aside to cover these costs. Please note that except in the case of the Cairo litigation and the TMDL litigation, virtually all of the litigation matters are being handled on an in-house basis by the County Attorney's Office, and thus the expenses set forth above relate to the costs of preparation for trial, including expert witnesses, consultants, costs of trial, and the like, and do not represent outside counsel fees. However, additional outside counsel fees may need to be included, based upon current staffing needs and those additional projects assigned to the County Attorney's Office by the Board. Thus, staffing for the ongoing litigation matters may need to be adjusted to address the new projects assigned by the Board (while the litigation matters may be referred to outside counsel).

Please advise us as to whether you need additional information regarding the above matters. Thank you for your continued cooperation and assistance.

cc: Vince Long, Assistant County Administrator
Kim Dressel, Director of Management Services
Gary Johnson, Director of Growth & Environmental Management

Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

To:

Honorable Chairman and Members of the Board

From:

Parwez Alam, County Administrator

Alan Rosenzweig, Director Office Management and Audget

Subject:

Midyear Funding Requests

Statement of Issue:

Consideration of an additional \$15,000 for funding of annual requests from citizens groups, youth groups and civic organizations.

Background:

At the April 13, 204 Board meeting, funding requests from The Challenger Learning Center, The Tallahassee Urban league and The FAMU Chapter of the Golden Key International Honor Society were not approved. The Board directed staff to consider funding these types of requests as part of the FY04/05 budget development process.

Analysis:

As reflected in Attachment #1, the Board has provided approximately \$15,000 annually for certain citizens groups, youth groups and civic organizations from the General Fund Contingency account. Often these requests are related to annual events, such as the NAACP Freedom Fund Awards Banquet or the City's Race Relations Summit. These types of requests are typically not eligible for funding through the Cultural Resource Commission (CRC) grant program, the Community Health Services Partnership (CHSP) or the County's Youth Athletic Scholarship program.

Based on the Board's continued desire to provide funding for these types of requests, the FY04/05 budget currently includes \$15,000 for this purpose. As these requests often are made at a point int time when the Commission may not be meeting, it is recommended that the expenditure can be authorized either by a majority vote of the Board or by the County Administrator. The account will be restricted to the support of events that have an overriding public purpose in the support of the community and are not eligible for receiving funds through any other grant program. The establishment of this account would provide the Board a maximum amount of funding available and thereby eliminate the use of the General Fund Contingency for such purposes.

Options:

1. Approve the inclusion of \$15,000 annually in the budget for funding of citizens groups, youth groups and/or civic organizations not eligible for grants from the Cultural Resource Commission, the Community Health Services Partnership or the County's Youth Athletic Scholarship program and allow the authorization to expend the funds be by majority vote of the Board or in the event time does not permit a vote of the Commission, then the expenditure can be authorized by the County Administrator.

Midyear Funding Requests June 8, 2004 Page 2

- 2. Do not approve the inclusion of \$15,000 annually in the budget for funding of citizens groups, youth groups and/or civic organizations not eligible for grants from the Cultural Resource Commission, the Community Health Services Partnership or the County's Youth Athletic Scholarship program.
- 3. Board Direction.

Recommendation:

Option #1, \$15,000 of additional funding is currently included in the FY04/05 tentative budget.

Subject:

Support for the Laura Lee Boys & Girls Club Facility Development

Project

Statement of Issue:

This budget discussion item seeks Board direction regarding the allocation of funds for support of the Laura Lee Boys & Girls Club.

Background:

During the April 20th Town Hall meeting for District 1, Commissioner Thaell requested staff to consider \$200,000 in support of the Boys & Girls Club as a part of the FY04/05 budget development process. In addition, at the May 25, 2004 Board, Commissioner Proctor requested staff investigate the donation of a parcel of County land adjacent to the facility.

Analysis:

As shown in attachment #1, the requested appropriation would contribute to the development of the Laura Lee Boys & Girls Club facility. The facility is expected to serve 400-500 children daily, as well as adults. This facility will provide programs in education, drug prevention, health care, art, music, sports and recreation. In addition, the building will allow for multiple youth-serving organizations, including Early Head Start and Kids Incorporated, to be housed in one location. The facility will contain a 500 seat auditorium, meeting and training space.

Phase 1 is currently nearing completion, with more than \$1.5 million in contributions. Current contributors consist of the National Boys & Girls Club, private donations, Kids Inc., local businesses and the City of Tallahassee. The City has contributed approximately \$650,000, originating from Community Development Block Grants (CDBG). Appropriated funds from Leon County would allow for completion of several areas of the facility. These include various Club rooms such as the Teen Center, dance studio, fine arts and fitness area, community areas such as the Parent Resource Center and Community Board room. Funds would also be utilized for overall landscaping and recreational facilities such as ball fields and nature areas.

Options:

- 1. Authorize the appropriation of \$200,000 for support of the Laura Lee Boys & Girls Club.
- 2. Do not authorize the appropriation of \$200,000 for support of the Laura Lee Boys & Girls Club.
- 3. Board Direction.

Recommendation:

Option #1, the \$200,000 is currently included in the tentative budget.

Request for Support: The Laura Lee Boys and Girls Club

Boys & Girls Clubs of the Big Bend An Investment in our Community's Future

What is the Laura Lee Boys and Girls Club

For more than a decade, the Boys and Girls Clubs of the Big Bend have served thousands of area youngsters after school and during summers and school breaks. We have operated the local Clubs in loaned or borrowed facilities: in abandoned school buildings, in housing projects and in local churches. We have often had to cram a hundred kids into a four bedroom apartment or a community center designed for far fewer occupants. In practically every location where we operate a Club, playground or recreational facilities are non existent or severely inadequate. Despite these facility challenges, we have grown into one of the largest and most respected community organizations in the area.

The Laura Lee Boys and Girls Club represents the most ambitious and promising facility development project in our organization's history. Located on five acres less than a block from south Monroe Street and Orange Avenue, this soon-to-be flagship Club will immediately serve several hundred children and youth daily as well as parents and adults who receive basic education and computer instruction.

The County's support for the Laura Lee Club would promote many priority public purposes, as outlined below:

- One of Leon County's top ten Priorities is the Southern Strategy. Another is the development of Youth Centers. Support of the Laura Lee Boys and Girls Club will give these priorities a huge boost.
- In addition to the Boys and Girls Clubs traditional academic, enrichment and recreation/fitness programs, the Laura Lee Club will:
 - Serve 400-500 kids a day from the south side of Leon County/Tallahassee and beyond
 - Sive Florida's Capital County its first ever flagship Boys and Girls Club, putting us on equal footing with other communities of like size across the State
 - Provide a <u>critical mass of programs</u> to help Leon County's children and families, including education, drug prevention, health care, arts and music, sports and recreation, and enrichment programs for citizens of all ages
 - Promote agency collaboration and bring together under one roof several of the County's strongest youth-serving organizations,

including an Early Head Start program for very young children operated by Kids Incorporated of the Big Bend

- Provide a 500 seat auditorium on the Southside for use by non profit groups and citizen organizations
- Provide conference, meeting and training space for citizen use
- Serve as a safe meeting place for children and youth of all ages
- Support the County's efforts toward <u>economic development</u> while at the same time <u>promote the development of productive, responsible</u> and caring citizens

How does the Boys & Girls Clubs of the Big Bend Benefit our Community?

More than 10,000 young people in the Big Bend live below the poverty level. Gangs, drugs, traffic, and violence are a fact of life for many of these youngsters. If our young people are to grow up and become productive citizens - often if they are to grow up at all - they need a place where they can receive the support and supervision so essential to positive youth development. During the critical after school hours, they need caring adults to help them develop the skills and self-confidence to say no to dangerous pastimes. The Boys & Girls Clubs of the Big Bend offers that and more to hundreds of area children and youth daily.

By implementing an effective and proven youth development strategy, Boys & Girls Clubs of the Big Bend help youngsters develop the self-confidence they need to achieve their full potential. Our programs build character through everyday leadership and guidance in behavior and attitude. For example, children that participate in after school programs are

- 1. more likely to stay in school and graduate
- 2. get higher grades and go on to higher education
- 3. improve their test scores
- 4. avoid gang membership as well as stay away from violent and dangerous behavior.

In our Big Bend Clubs, evaluation studies show that our members show significant improvement in grades, behavior, homework preparation, school attendance, and attitude. More than half of Boys and Girls Clubs alumni say participating in a Boys & Girls Club "really saved my life." Many add that if not for a Club, they would literally be dead, in jail, or otherwise leading an existence with little meaning. Studies show that students who do not join an after school program are six times more likely to get a criminal conviction than kids in the same school who participate in an after school program. And, according to a study by the University of Southern California, being unsupervised after school doubles the risk an eighth grader will smoke, drink or abuse drugs.

Crime prevention is only one benefit of after school programs. Studies show that students who participate in after school programs are half as likely to drop out of high school, and two and a half times more likely to go on to further education.

A recent study by the Rose Institute on State and Local Government found that for every \$1 invested in after school programs, taxpayers save \$3 by reducing juvenile arrests, incarceration, grade repetition, and other costs to society.

It costs less than \$1,000 dollars a year to provide a comprehensive after school program for a child, but over \$50,000 dollars a year to incarcerate a juvenile offender and over a million dollars in direct and indirect costs if juveniles become career criminals. Simply put, we can invest in our children now, or we can pay a much higher price later on.

What makes the Boys & Girls Clubs of the Big Bend Unique?

Like other Boys & Girls Clubs throughout America, our local Clubs provide support that is significant but distinguishable from what young people get elsewhere – at home, in school, in church, in other private and public agencies or in public recreation. Several attributes make the Boys & Girls Clubs of the Big Bend unique: We have full-time professional leadership at each Club; we are affordable for all girls and boys; we have an open door policy and no eligibility criteria; we are always open when school is not; and we are building-centered.

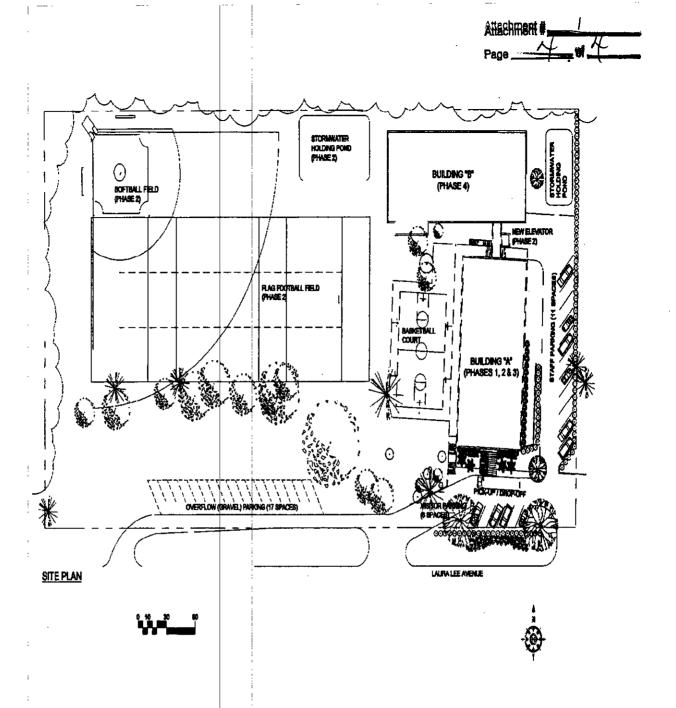

Who has contributed thus far to develop the Laura Lee Club? Of the more than \$1.5 million invested thus far in the Laura Lee facility, contributions have come from the City of Tallahassee (\$650,000), local contributors and businesses, private financing arranged by our organization, and a capital investment by Kids Incorporated.

What would Leon County's investment be used for?

Much of the infrastructure of the facility has been funded and completed. However, additional funds are needed to finish several key areas of the facility, including various Club rooms such as the Teen Center, dance studio, fine arts and fitness area, community areas such as the Parent Resource Center and Community Board room, as well as the overall landscaping and recreational facilities (ball fields, basketball court, and nature areas).

The support of Leon County would go far toward ensuring that the Laura Lee Club and facility is completed in a high quality manner fitting for the hundreds of children, parents and county citizens who will use the facility daily. We appreciate the County's support of our efforts and welcome the County's participation in this most important project.

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

Subject:

Request for funding for the Riley House- Lake Hall School Acquisition

and Restoration Project

Statement of Issue:

This item seeks Board consideration for funding of the Riley House's project to purchase and restore Lake Hall School.

Background:

During the Board meeting on May 11, 2004 Ms. Althemese Barnes requested that the County Commission to consider providing \$105,000 for the purchase and restoration of Lake Hall School. Thereafter, the Board motioned that the Tourist Development Council (TDC) consider providing funds towards this effort as it would be considered a cultural tourist attraction. In addition, the Board requested that the Cultural Resources Commission (CRC) consider funding the project.

Funding for the Lake Hall School was discussed at TDC's meeting held on May 18, 2004. At this meeting, TDC voted not to provide funds for the purchase and restoration of The Lake Hall School. The concern was if the TDC funded this project, it would open the door for similar requests. The TDC stated that the intent of its programs is to fund advertising and marketing for all of the stakeholders in the Leon County tourism industry, including The Lake Hall School, if it becomes an attraction.

The Executive Director of the CRC also notified OMB that the Lake Hall School project would not be eligible for funds during the current year.

The stated goal of the Lake Hall School project is to increase awareness of the cultural richness of Leon County, while also contributing to the economy through job creation, purchase of goods and services, attracting tourists and new businesses as well as revitalizing the neighborhood.

The restored one-room schoolhouse will be used as a museum and cultural community center with a focus on early African American education and history in Leon County. Lake Hall is one of 52 one-room schoolhouses that once existed in the county to serve newly freed slaves and

Request for funding for the Riley House-Lake Hall School Acquisition and Restoration Project June 8, 2004

Page 2

their descendents. It is the only one that still stands on its original location and has not been restored for adaptive reuse.

Analysis:

The Riley House has been approved for a \$251,000 grant from the State of Florida, to be used towards the restoration of the schoolhouse and to assist with the relocation of Mr. David Walker, who currently resides on the land. The County previously donated \$25,000 in 2003 that will be use to complete the project.

County funds are specifically being sought to purchase the property where the school is located and to assist in the relocation of Mr. David Walker. The \$105,000 that is currently requested is needed for this project to be completed. County funding for this project will be appropriated out of general fund revenues.

Options:

- 1. Fund the Riley House- Lake Hall project at 105,000.
- 2. Fund the Riley House- Lake Hall project at an amount to be determined by the Board.
- 3. Do not fund the Riley House- Lake Hall project.
- 4. Board Direction.

Recommendation:

Option #1, the \$105,000 is currently included in the tentative budget.

Parwez Alam, County Administrator

Lillian Bennett, Assistant to the County Administrator

Vincent Long, Assist. County Administrator/Director of Public Services

Subject:

FY04/05 Funding of Board Priority #7 - The Evaluation of the Need for a

Women's Healthcare Center at the Bond Community Health Clinic

Statement of Issue:

Consideration to provide funding for Board Priority #7 - \$60,000 for the evaluation of the need for a Women's Healthcare Center at the Bond Community Health Clinic.

Background:

The Board's Priority #7 "Women's Health Center on Southside" states that an evaluation of the need for a Women's Healthcare Center at the Bond Community Health Clinic be performed.

Analysis

A RFP for such evaluation is currently being prepared. The Board will be requested to approve the issuance of the RFP at the June 8, 2004 Board meeting. It is anticipated that the evaluation of the need for a Women's Health Care Center at the Bond Community Health Clinic will cost approximately \$60,000. The Primary Healthcare program will provide the funding for this study. The timeline for the issuance of the RFP and the selection of a consultant to perform the needs assessment will be as follows:

•	Board Approval of Issuance of	RFP	June 8, 2004
•	RFP Responses Received and E	valuated	July 13, 2004
•	Board Approval of Consultant	Selection	July 27, 2004
•	Conduct Needs Assessment (3	months)	October 26, 2004
•	Board Acceptance of Final Rep	ort	November 9, 2004

Since the final report for the evaluation of Women's Health Center will not be completed prior to the end of the current fiscal year, staff is recommending that approximately \$1 million is set aside in reserves in the 2004/05 budget in anticipation of completion of the study in November 2004. Funds set aside will be used for land acquisition, design services, operating expenses and equipment associated with the development of a Women's Health Care Center. Staff will be reviewing several alternatives, including the use and expansion of existing facilities, joint partnerships with the Leon County School Board as well as construction of a stand alone facility. The additional \$1 million will require an increase in the Primary Health Care MSTU from .12 mils to .22 mils, an increase of approximately .10 mils.

Budget Discussion Item: FY04/05 Funding of Board Priority #7 - The Evaluation of the Need for a Women's Healthcare Center at the Bond Community Health

Clinic

June 8, 2004 Page 2

Options:

- 1. Approve \$60,000 in the Primary Healthcare fund budget for the Women's Healthcare Center evaluation for FY 04/05.
- 2. Approve an increase of 0.10 mills in the Primary Health Care MSTU to reserve \$1 million for land acquisition, design services, operating expenses and equipment associated with the development of a Women's Health Care Center.
- 3. Do not approve \$60,000 in the Primary Healthcare fund budget for the Women's Healthcare Center evaluation for FY 04/05.
- 4. Do not approve an increase of 0.10 mills in the Primary Health Care MSTU to reserve \$1 million for the land acquisition, design services, operating expenses and equipment associated with the development of a Women's Health Care Center.
- 5. Board Direction.

Recommendation:

Options #1 and #2, funding of \$60,000 for the study and an increase of \$1,00,000 (0.10 mil increase) for the anticipated land acquisition, design services, operating expenses and equipment associated with the development of a Women's Health Care Center are included in the tentative budget.

FY04/05 Funding of the Healthy Start Program's Fetal and Infant

Mortality Review (FIMR) Project

Statement of Issue:

Consideration to fund \$17,600 for the Healthy Start program's Fetal and Infant Mortality Review (FIMR) project.

Background:

At the May 11, 2004 Board meeting, Commissioner Thaell requested approximately \$17,600 for the Healthy Start program's Fetal and Infant Mortality Review (FIMR) project be considered as part of the FY04/05 Budget process.

Analysis:

The Healthy Start program manages and provides technical assistance to the area's Fetal and Infant Mortality Review (FIMR) project. There are 12 of the projects within the State. The lead FIMR project in Florida is the Panhandle Fetal and Infant Mortality Review project located in Tallahassee. The program has a 12 year history in this area. The Healthy Start program performs root cause analysis on infant deaths and performs targeted interventions with appropriate care providers. The group has been very effective in reducing (and sustaining that reduction) infant mortality in the local area. This is a comprehensive quality improvement service for the Leon County maternal and child healthcare delivery system.

The Healthy Start program currently has a \$26,000 deficit. The Panhandle Fetal and Infant Mortality Review project area is made up of 6 counties. The deficit is being divided among the 6 member counties according to population. \$17,600 is required annually from Leon County from the Primary Healthcare program to keep the project out of deficit. The \$17,600 is in addition to the current Community Health Services Partnership funding for FY04/05, which is anticipated to be at least \$30,000.

Options:

- 1. Approve \$17,600 in the Primary Healthcare fund budget for the Healthy Start program for FY04/05.
- 2. Do not approve \$17,600 in the Primary Healthcare fund budget for the Healthy Start program for FY04/05.
- 3. Board Direction.

Recommendation:

Option #1, the additional \$17,600 is currently included in the tentative FY04/05 Budget.

\$32,000 Funding Request for Recreation Councils and Community Center

Boards to Provide Public Recreation Programs and Community Services

Statement of Issue:

This budget discussion item seeks \$32,000 in one-time funding for recreation councils and community center boards to continue providing recreation programs and community services as independent non-profit organizations.

Background:

At the May 11, 2004 Board of County Commissioners meeting the Board accepted staff's status report and recommendations concerning the ongoing restructuring process for local recreation councils and community center boards. Included in the recommendations was a request to prepare a budget discussion item for \$32,000 in funding to provide financial assistance to these organizations in exchange for the continued provision of recreation programs and community services.

There are currently five local recreation councils in unincorporated Leon County providing youth recreation services at five Leon County community parks. These services include youth football, soccer, cheerleading and basketball. Youth baseball and softball are provided through an independent organization, Little League, Incorporated. Educational, recreational and social programs are also provided through three community center boards in Fort Braden, Miccosukee and Chaires.

As part of the restructuring process, it is intended the recreation councils and community center boards will become independent 501(c)(3) organizations, providing youth and community services to Leon County residents through facility specific license and management agreements for community parks and centers. Their change in status from Board appointed organizations to independent organizations will protect Leon County from potential sunshine and ethics law violations. However, loss of their Board appointed status will also include a loss of current benefits such as liability insurance and other in-kind administrative functions currently provided by the Division of Parks and Recreation.

Analysis:

In order to ensure a successful transition from Board appointed organizations to independent nonprofit service organizations, staff is recommending financial assistance to the groups to offset their Budget Discussion Item: \$32,000 Funding Request for Recreation Councils and Community Center Boards to Provide Public Recreation Programs and Community Services

June 8, 2004

Page 2

increasing operational costs in return for the continuing provision of recreation programming and community services to Leon County residents at affordable and competitive registration fees.

The total funding request is \$32,000. Of that amount, \$4,000 would be directed to cover the filing fees associated with attaining non-profit tax exempt status. The remaining \$28,000 would be directed to the individual recreation councils and community center boards. Approximately 2,200 youths currently participate in youth football, soccer, cheerleading, and basketball. Current registration fees range from \$30 to \$60 per child, which is comparable to similar programs offered through the City of Tallahassee Parks & Recreation Department. Increased overhead and administrative costs are anticipated to add \$12 to \$15 to registration fees after the recreation councils and community center boards become independent organizations. The \$28,000 would be directed toward offsetting these fee increases, thereby allowing the fees to remain affordable for participants. The amount directed to each individual organization would be based on the number of participants registered in programs.

There is no plan to provide financial assistance to the Little League organizations. Their current structure and national governing body absorb a majority of the administrative costs for these organizations. Financial reports submitted by area Little Leagues also show them to be in good standing with no fiscal hardship.

The funding request is currently for the 2005 budget year only. Staff is hopeful the attainment of non-profit status will open the door to other funding sources including grants and corporate sponsorship, thereby reducing the need for continued financial assistance in later years. Additionally, future affiliation with other national youth sports program providers such as Pop Warner football may reduce overhead costs in much the same way Little League organizations currently operate in Leon County.

Options:

- 1. Accept staff report and direct \$32,000 in one-time funding to recreation councils and community center boards to assist in transitioning these organizations to independent 501(c)(3) organizations and providing recreation and community services at affordable rates for Leon County citizens.
- 2. Do not accept staff report and do not provide \$32,000 in one-time funding to recreation councils and community center boards to assist in transitioning these organizations to independent 501(c)(3) organizations and providing recreation and community services at affordable rates for Leon County citizens.
- 3. Board Direction.

Recommendation:

Option #1, \$32,000 is included in the tentative budget.

Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

TO:

Honorable Chairman and Members of the Board

FROM:

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

SUBJECT:

Increased Funding Requests – Existing Permanent Line Item Agencies

Statement of Issue:

This item seeks Board consideration for funding of \$160,176 in increased requests for existing permanent line item funded agencies in the FY 04/05 budget.

Background:

As part of the annual budget process, a number of existing permanent line item funded agencies have requested additional funds.

Analysis:

The following is a summary of the additional requests:

- 1. \$40,000, Cultural Resources Commission (CRC): Increased costs associated with the implementation of the Cultural Plan. Existing funding is \$75,000.
- 2. \$50,000, CRC Grant Program: Requested increase to the cultural grant program. The existing grant program is \$147,000.
- 3. \$32,000, DISC Village: The request is to replace funding for the Civil Citation program at the Juvenile Assessment Center (JAC) previously supported Local Law Enforcement Block Grant funds. Existing funding is \$75,000.
- 4. \$30,666, Tallahassee Senior Citizens Foundation: Additional caregiver training and an addition of a "Senior Day" in Northwest Leon County. Existing funding \$75,136.
- 5. \$7,500, Tallahassee Trust for Historic Preservation: Additional funding to cover cost of living adjustments. Existing funding is \$55,000.

OPTIONS:

- 1. Direct staff to include the additional \$160,176 in the FY04/05 tentative budget.
- 2. Direct staff to include a different amount of funding in the FY04/05 budget.
- 3. Do not provide the additional funding as part of the FY04/05 budget.
- 4. Board Direction.

RECOMMENDATIONS:

Option #1, an additional \$160,176 is included in the tentative budget.

Kim Dressel, Management Services Director

Subject:

Summer Youth Employment Program

Statement of Issue:

Consideration to provide an additional \$25,000 to the Summer Youth Employment Program.

Background:

At the May 11th meeting of the Leon County Board of County Commissioners, Commissioner Thaell requested that an additional \$25,000 for the Summer Youth Employment Program be considered as part of the FY 04/05 budget process.

Analysis:

In the summer of 2003, the Summer Youth Program employed 53 young men and women. For summer 2004, 50 regular positions and three Ability 1st positions will be funded. About 2,200 applications have been received for the 50 regular positions. Since each youth could apply for three positions, the applications received account for about 734 persons.

For the past two years over 2,000 applications have been rejected for the Summer Youth Employment Program. Last year the rejections included 630 youths. The additional \$25,000 could support 28 new positions for 2004-05. A survey that was conducted among Board and Constitutional managers showed that 78 positions could potentially be filled. The additional funding would increase the Summer Youth Employment Program budget to \$75,000.

Options:

- 1. Approve the inclusion of an additional \$25,000 in funding for the Summer Youth Program.
- 2. Do not approve the inclusion of an additional \$25,000 in funding for the Summer Youth Program.
- 3. Board direction.

Recommendation:

Option #1, the additional \$25,000 is currently included in the tentative budget.

Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

To:

Honorable Chairman and Members of the Board

From:

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

Subject:

Community Human Service Partnership (CHSP) funding by 10%

Statement of Issue:

This item seeks Board consideration to increase CHSP funding by an additional 10% in the FY 04/05 budget.

Background:

During the February 24, 2004 Commission meeting, the Board requested staff consider a 10% increase in base funding for CHSP during the budget development process.

Analysis:

In the past 3 years, the County has annually contributed \$610,400 for a total of \$1,831,200 to CHSP. Since FY01/02 the average agency request has exceeded the actual total appropriation received. As reflected below, CHSP agency requests have historically exceeded total appropriation by an average of 33%.

Year	CHSP Agency Requests	CHSP Allocation	\$ Difference	% Difference
FY2004/2005	\$6,893,161	\$4,714,419	(\$2,178,742)	32%
FY2003/2004	\$6,440,436	\$4,529,792	(\$1,910,644)	30%
FY2002/2003	\$6,735,302	\$4,367,618	(\$2,367,684)	35%
FY2001/2002	\$6,792,922	\$4,285,949	(\$2,506,973)	37%
Average	\$6,715,455	\$4,474,445	(\$2,241,011)	33%

Should the Board approve the 10% increase, an additional \$61,000 in base funding for the CHSP process would increase the overall FY04/05 appropriation for CHSP to \$671,440. The additional funding to CHSP will be appropriated from County general revenue sources.

Options:

- 1. Approve an additional \$61,000 funding for CHSP in FY04/05.
- 2. Fund CHSP at an amount to be determined by the Board.
- 3. Do not increase base funding for CHSP in FY04/05.
- 4. Board Direction.

Recommendation:

Option #1, the additional \$61,000 is included in the tentative budget.

Budget Discussion Item

SUBJECT:

Increased Funding Request for Guardian Ad Litem

Statement of Issue:

This item seeks Board consideration for funding of \$55,000 to support funding of Guardian Ad Litem.

Background:

As part of the implementation of Article V, Revision 7, the County is no longer obligated to pay for positions associated with the Guardian Ad Litem program. The Director of the Guardian Ad Litem Program has indicated that the State of Florida will not be providing funding for all of the local positions and is requesting the Board provide funding.

Analysis:

As reflected in Attachments#1 & #2 Guardian Ad Litem is requesting the Board to fund three half time positions currently supporting the program. The funding request is for \$55,000. As discussed in the Article V budget discussion item, the funding of the Guardian Ad Litem positions is now a State responsibility. The County received a number of requests to fund items not being supported by the State. In all situations, County staff has not recommended funding for obligations of the State.

OPTIONS:

- 1. Direct staff to include \$55,000 in funding for 3 part-time positions for the Guardian Ad Litem program.
- 2. Direct staff to not fund \$55,000 in funding for 3 part-time positions for the Guardian Ad Litem program.
- 3. Board Direction.

RECOMMENDATIONS:

Option #2, an additional \$55,000 in funding for Guardian Ad Litem is currently not included in the tentative budget.

County Funded positions

Dear County Commissioners:

Currently, the Guardian ad Litem Program has 135 open Leon County dependency cases. We have approximately 3.41 FTEs assigned to these cases for an average caseload of 40 cases per employee/case coordinator. Since our State office recommends each case coordinator carry no more than 25 cases at a time, we are clearly exceeding this recommendation. In addition, the State office recommends our full-time attorneys carry no more than 100 cases. Thus, we are once again, exceeding the established standard. (Note: It should be known that the aforementioned figures exist despite the fact we have narrowed our criteria for the acceptance of cases to include the rejection of those involving children over 5 years of age.)

Now that my State Office has indicated there is little chance they will be able to pick up all my Leon County funded positions, I am left to consider further reducing my Leon County caseload or appealing to you to reconsider your decision to eliminate funding.

Given that our Leon County needs already exceed what I am reasonably expected to handle, I am reluctant to further reduce the caseload. In addition, since it became known that Leon County will privatize its child welfare services effective July 1, 2004, we have observed increased instability in the Department of Children and Families' management of our cases. Consequently, I fear leaving more Leon County cases unassigned will result in placing our children at greater risk.

I welcome the chance to have a more detailed discussion with you concerning this topic. Your suggestions and thoughts are most appreciated.

Sincerely,

Marcia Hilty-Reinshuttle Director Guardian ad Litem Program (850) 921-4998 or (850) 488-7612

Parwez Alam, County Administrator Tony Park, P.E., Director of Public Works

Subject:

Establishment of a tipping fee for the Electronics Recycling Program

Statement of Issue:

This budget discussion item seeks to establish a tipping fee to recover the costs of operating an electronics recycling program.

Background:

Electronics have been identified as Hazardous Waste by the US Environmental Protection Agency definitions and Florida Statutes as defined by F.S.403. Residents are exempt from Hazardous Waste regulations while businesses and government are not.

The Solid Waste Facility (landfill) cannot accept electronics as Class III waste nor can the Transfer Station. In addition, Jackson County's Springhill Landfill, our contractor for solid waste disposal, does not accept electronics for disposal.

In October 2002, an electronics recycling program was established with a \$50,000 grant from the Florida Department of Environmental Protection. Leon County contracted with Unicor, a division of Federal Prison Industries, Inc. to recycle electronics. In 2003, FDEP asked Leon County to partner with Goodwill Industries to continue and expand the electronics recycling program. FDEP granted another \$50,000 for an additional year of electronics recycling which ended in March 2004. Consequently, reserves are being utilized to fund the program through the end of this fiscal year.

Goodwill agreed to accept televisions, computers and other electronics, use them as a vocational training program for its clients and sell what they repaired and refurbished. FDEP was particularly interested to see if Goodwill could sustain a program independent of County or State assistance. Goodwill has concluded that the revenue from the sale of electronics through their retail shops is not sufficient to cover cost of the program, particularly the recycling/disposal of non-reparable units.

A statewide survey funded by FDEP, produced by Kessler Consulting, Inc., found that in 2003, Florida households were in possession of approximately 22.9 million televisions and monitors. The total lead content of televisions and monitors equaled 129 million pounds. Ninety-nine percent of Florida households have at least one television, 57% own three or more. There was nearly 100% growth in the number of households with four TVs from 2000 to 2003.

Agenda Request: Establishment of a tipping fee for Electronics Recycling Program June 8, 2004

Page 2

The study also found that 74% of Florida households have at least one computer, half of which plan to replace it every 2-5 years. Only 9% have ever bought a used computer. This study also found that 43% prefer to pay for recycling at the time of disposal as opposed to paying at the time of purchase.

During the last two years, there have been many studies, product stewardship initiatives by major manufacturers, federal government committees and others who have tried to solve the issue of who is ultimately responsible for obsolete electronics. Basically, as long as there are no take-back laws, local governments are responsible for disposal of waste or recycling where markets exist. Markets are developing for various components of electronics, such as metals and plastics, but, there are hazardous components as well, such as lead which is very harmful to the environment.

Analysis:

The Electronics Recycling Program will end September 30, 2004 if no additional funding is allocated. This would likely cause a considerable increase in illegal dumping. To provide continued funding for the program staff is recommending an Electronic Waste Tipping Fee be established. The cost is estimated to be \$75 per ton. However, individual residents will be allowed to dispose of one (1) electronics item per visit at no charge. Each pound of goods would cost 3.75 cents to dispose. Assuming a television weighs 40lbs then it would cost \$1.50 to dispose. The proposed fee structure is being modeled after the existing waste tire disposal program. Under the waste tire program, residents are allowed to dispose of four tires free. All disposals by businesses or residents in excess of four tires are charged \$100 per ton.

Based on an estimated 800 tons of electronics being disposed, the program would generate approximately \$60,000 in revenue. This would cover the cost of a recycling technician (\$30,000) and the contract for disposal of the goods (\$30,000).

Staff evaluated other options to fund the program, such as increasing the overall tipping fee or a per unit charge. However, due to the unique nature of the disposal requirements and the varying degree of weights involved, a separate tipping fee appears to be the most equitable method available.

Options:

- 1. Approve a tipping fee of \$75 for business and government electronics recycling effective October 1, 2004 including allowing residential customers one free component drop off per visit.
- 2. Board Direction.

Recommendation:

Option #1 is included in the tentative budget.

Subject

Asian Tiger Mosquito/Hand-Fogging Program

Statement of Issue:

This item seeks board consideration of funding alternatives for the Mosquito Control Hand Fogging Program

Background:

Currently, the number of citizen requests for hand-fogging services to combat the Asian tiger mosquito problem is exceeding the Division's staffing levels and other resources required to meet those demands. Since this program has the potential to expand even more over the next few years, consideration should be given to establishing a user fee to offset the cost of the program, providing adequate staffing and resources to meet the increasing demands for service.

The Asian tiger mosquito was introduced into Florida in the late 1980's and quickly spread into Leon County. This mosquito differs from the other mosquitoes found in Leon County in that it primarily breeds in containers and is active and biting during the daytime hours. This means that the fog trucks which do an excellent job controlling night-time mosquitoes are ineffective in controlling the Asian tiger mosquito. The Division responded to this challenge in 1998 by launching a new program which, in addition to the education and inspection components, included the use of hand-held foggers to control the adult mosquitoes. Because the Asian tiger mosquito typically flies only a short distance and stays in a very confined area near its hatching source it is very susceptible to hand-fogging treatments.

The original design and protocols established for the hand-fogging program were based on several assumptions. The first assumption was that under most situations the sources of the Asian tiger mosquito problems could be identified and eliminated. It was thought that if you eliminated the obvious sources from a citizen's property, effective control could be achieved. Unfortunately, the number and types of sources have exceeded all previous estimates. There are many areas in the city where the Asian tiger mosquito is abundant and where heavy vegetation and/or inaccessibility have hindered the identification of these sources. The second assumption dealt with the projection that in a normal year the Division would expect to conduct around 1,000 hand-fogs per year. The protocols for the program were established based upon this assumption. In 1998, the Division conducted 1,024 hand-fogs. That number has grown to more than 5,000 in 2003. The Division's staffing level has remained virtually unchanged since 1998.

Agenda Request: Budget Discussion Item – Asian Tiger Mosquito/Hand-Fogging Program June 8, 2004

Page 2

Analysis:

There are several alternative proposals to deal with the Asian tiger mosquito problem, but first it is important to understand the difference in hand-fogging applications and other types of mosquito control activities. Traditional mosquito control services such as truck fogging, ground and aerial larviciding provide a benefit to many people in an area. Hand-fogging applications are generally made on a single person's property and the benefit for the most part is confined to that residence. This type of service is more closely aligned with the spraying activities normally handled by pest control companies.

As stated before, it is expected that the demand for the program will continue to escalate. Because of the potential for rapid growth of this service, it is important for the Board to determine the direction of the program. Provided below are several alternatives for the Board to consider:

Alternative 1

The first alternative proposes implementing a hand-fogging "Fee for Service" program with a fee of \$25 per service request. This program would operate for one year utilizing current staffing with the exception of position. After the one year evaluation period, the Division will determine the actual demand for the "Fee for Service" program and if additional resources or an adjustment to the user fee is necessary.

As stated earlier, hand-spraying usually benefits only one residence, and closely resembles applications made by pest control companies. In this sense, should the Board decide to recover some of the cost of the program; a case can be made that the property owner should contribute over and beyond the taxes paid for other mosquito control services.

In general it is expected that the number of service requests will go down considerably (more than half) if the fee is implemented. This reduction in service requests will allow the Division to handle the workload with existing staff except for the upgrade of the part-time OPS Administrative Assistant II position to a full-time career service Administrative Assistant II. This upgrade is needed to handle the additional billing aspects of the program.

Projections based on the criteria in this report place the user fee at \$25 per service request. The \$25 fee was calculated with the intent of recapturing all direct costs of the program and the costs of the Administrative Assistant II upgrade (\$21,866). Depending on whether the low end (1,500) or the high end (2,000) of the projected service requests is achieved, the implementation of the fee would generate between \$37,500 and \$50,000 per year, respectively.

Agenda Request: Budget Discussion Item – Asian Tiger Mosquito/Hand-Fogging Program June 8, 2004

Page 3

Alternative 2

The second alternative proposes maintaining the current level of staffing and resources. Under this approach, staff will continue to respond in a timely fashion. However, depending on the actual volume of calls within a given period, some requests my take up to 5 days to respond.

Options:

- 1. Approve Alternative 1 Direct staff to implement a \$25 "Fee for Service" for all hand-fogging service requests and approve upgrade of a part-time OPS Administrative Associate II to a full-time career service Administrative Associate II.
- 2. Approval Alternative 2 Direct staff to maintain current level of service with no additional resources.
- 3. Do not approve.
- 4. Board Direction.

Recommendation:

Option 1

Board of County Commissioners Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

To:

Honorable Chairman and Members of the Board

From:

Parwez Alam, County Administrator

Alan Rosenzweig, Director, Office of Management and Budget

Subject:

Article V/Revision 7

Statement of Issue:

This budget discussion item provides the Board budget information relating to the implementation of Article V/Revision 7.

Background:

Article XI, section 2 of the State Constitution provides for the creation of a thirty-seven member constitution revision commission (CRC) for the purpose of reviewing Florida's Constitution and proposing changes for voter consideration. The last revision commission was appointed in 1997. When the work of the CRC was completed in May 1998, it had adopted nine proposed revisions to the State Constitution to be placed on the November ballot for consideration by the voters.

Revision 7, proposed by the CRC, was adopted by the voters at the 1998 November election. The revision made several changes to Article V of the State Constitution, including extensive changes to section 14 related to funding. These changes revised the method by which the judicial system is funded by specifying the costs to be paid by the state, the counties or by other sources. Attachment #1 provides the actual text of Article V.

To begin the implementation of Revision 7, the 2000 Legislature created Chapter 29, Florida Statutes which provided the framework for identifying and defining the components of the state court system. During the 2003A Special Session of the Legislature, House Bill 113A was passed by the legislature and subsequently signed into law by the Governor. During the 2004 Legislative Session, the legislature passed Senate Bill 2962 which provides numerous amendments and changes to the previously approved legislation. The analysis section of this discussion item provides the impacts of this bill on the County.

Analysis:

In part, Article V Section 14 of the Florida Constitution reads:

Counties shall be required to fund the cost of communications services, existing radio systems, existing multi-agency criminal justice information systems, and the cost of construction or lease, maintenance, utilities, and security of facilities for the trial courts, public defenders' offices, state attorneys' offices, and the offices of the clerks of the circuit and county courts performing court-related functions. Counties shall

Budget Discussion Item: Article V/Revision 7

June 8, 2004

Page 2

also pay reasonable and necessary salaries, costs, and expenses of the state courts system to meet local requirements as determined by general law.

Attachment #2 provides a summary of the new legislation prepared by the County Attorney.

To develop the FY04/05 budget, a series of meetings were held between OMB, MIS, Management Services Administration, Court Administration, the State Attorney's Office, the Public Defender's Office, Guardian Ad Litem and the Clerk of the Circuit Court. All parties are currently in agreement regarding the FY04/05 requested budget.

Attachment #3 provides a detailed listing of proposed expenditures and revenues relating to the implementation of Article V. As reflected in the table below, the Board needs to be aware that during the legislative session additional mandates are now being required of the County. In addition to the current year changes, over the past five years the State has either reduced revenues or shifted expenditures totaling \$3.471 million to the County. Taking into consideration these prior shifts and the anticipated current year savings, the County will have absorbed over \$1.1 million. The following table provides a summary of the aggregate budget impacts.

Total Cost to County of Revenue Reductions and Cost Shifts	(\$1,104,216)
FY1999 - 2004 Cost Shifts and Revenue Reductions	(\$3,471,183)
Total FY04/05 Savings	\$2,366,967
FY04/05 Cost Shift Dept. of Juvenile Justice	(\$1,407,906)
Total FY04/05 Expenditure Savings	\$6,112,672
Total FY04/05 Revenue Loss	(\$2,337,799)

As part of the implementation of Article V, the Clerk of the Circuit Court has previously informed the Board that the Clerk's Office may request transition funding for the 15 month period of July 1, 2004 through September 30, 2005. It appears that Senate Bill 2962 does not properly fund the Clerk's information technology budget. The Clerk has acknowledged that if during the next legislative session the funding is not corrected then the Clerk will make the necessary budget adjustments. OMB concurs with the necessity to provide this transition funding, with the understanding that this is one time in nature and does not in any way commit the Board to any future obligation. The adopted FY03/04 budget includes the necessary appropriation to provide the funding for the period of July 1, 2004 through September 30, 2004. For FY04/05, the Clerk has advised that the excess fee revenue that will be returned to the Board at the end of the current fiscal year will be greater then the amount originally anticipated in the adopted budget. The Clerk is requesting that

Budget Discussion Item: Article V/Revision 7

June 8, 2004

Page 3

\$225,000 of the additional funds be returned to the Clerk for next year's transition. This approach will not require any additional funds be appropriated in the FY04/05 budget for the Clerk and will not adversely impact the current year budget.

Options:

- 1. Accept staff's report on Article V/Revision 7.
- 2. Authorize the use of current year appropriation to provide transition funding for the Clerk of the Circuit Court for the period of July 1, 2004 through September 30, 2004 and authorize that at the appropriate time upto \$225,000 in additional unanticipated excess fee revenue be returned to the Clerk to provide transition funding for FY04/05 with the clear understanding and acknowledgment from the Clerk that this is one time funding and will not be authorized in subsequent year's budgets.

Recommendation:

Options 1 and 2.

SECTION 14. Funding.--

- (a) All justices and judges shall be compensated only by state salaries fixed by general law. Funding for the state courts system, state attorneys' offices, public defenders' offices, and courtappointed counsel, except as otherwise provided in subsection (c), shall be provided from state revenues appropriated by general law.
- (b) All funding for the offices of the clerks of the circuit and county courts performing court-related functions, except as otherwise provided in this subsection and subsection (c), shall be provided by adequate and appropriate filing fees for judicial proceedings and service charges and costs for performing court-related functions as required by general law. Selected salaries, costs, and expenses of the state courts system may be funded from appropriate filing fees for judicial proceedings and service charges and costs for performing court-related functions, as provided by general law. Where the requirements of either the United States Constitution or the Constitution of the State of Florida preclude the imposition of filing fees for judicial proceedings and service charges and costs for performing court-related functions sufficient to fund the court-related functions of the offices of the clerks of the circuit and county courts, the state shall provide, as determined by the legislature, adequate revenues appropriated by general law.
- (c) No county or municipality, except as provided in this subsection, shall be required to provide any funding for the state courts system, state attorneys' offices, public defenders' offices, court-appointed counsel or the offices of the clerks of the circuit and county courts performing court-related functions. Counties shall be required to fund the cost of communications services, existing radio systems, existing multi-agency criminal justice information systems, and the cost of construction or lease, maintenance, utilities, and security of facilities for the trial courts, public defenders' offices, state attorneys' offices, and the offices of the clerks of the circuit and county courts performing court-related functions. Counties shall also pay reasonable and necessary salaries, costs, and expenses of the state courts system to meet local requirements as determined by general law.
- (d) The judiciary shall have no power to fix appropriations.

BOARD OF COUNTY COMMISSIONERS

INTER-OFFICE MEMORANDUM

Son

To:

Honorable Chairman and Members of the Board of County Commissioners

Parwez Alam, County Administrator

From:

Herbert W.A. Thiele, Esq.

County Attorney's Office

Date:

May 14, 2004

Subject:

Implementation Legislation Mandated by Revision 7, Article V of the Florida

Constitution

As you are aware, in November of 1998, the Florida Electorate approved Revision 7 to Article V of the Florida Constitution. Article V provides for the Judicial Branch of State Government. Revision 7 was designed to allocate a State Courts System, State Attorney Offices, Public Defender Offices, and court-appointed counsel funding mechanism among the State, Counties, and users of the Courts. Revision 7 is required to be fully implemented by the Legislature no later than July 1, 2004. In an effort to establish the framework for the transition of the State Courts System, State Attorney Offices, Public Defender Offices, and court-appointed counsel funding responsibility, the Legislature in 2003 adopted House Bill 113A. Nevertheless, implementation legislation remained to be adopted during the 2004 legislative session. Senate Bill 2962, adopted by the Legislature during this past session, provides the remaining legislation for a full transition by the State to comply with Revision 7.

Constitutional Revision 7 reads as follows:

Art. V, s.14 Funding.

- (a) Justices and Judges shall be compensated only by state salaries fixed by general law. Funding for the state courts system, state attorney's offices, public defender offices, and court-appointed counsel, except as otherwise provided in subsection (c), shall be provided from state revenues appropriated by general law.
- (b) All funding for the offices of the Clerks of the Circuit and County courts performing court-related functions, except as otherwise provided in this subsection (c), shall be provided by adequate and appropriate filing fees for judicial proceedings and service charges and costs for performing court-related functions as required by general law. Selected salaries, costs, and expenses of the state courts system may be funded from appropriate filing fees from judicial proceedings, service charges and costs from performing court-related functions as provided by general law.

Memorandum to Board and County Administrator

Re: Implementation Legislation Mandated by Revision 7, Article V of the Florida Constitution

May 14, 2004

Page 2

Where the requirements of either the United States Constitution or the Constitution of the State of Florida preclude the imposition of filing fees for judicial proceedings and service charges and costs for performing court-related functions sufficient to fund the court-related functions of the offices of the Clerks of the Circuit and County courts, the state shall provide, as determined by the legislature, adequate and appropriate supplemental funding from state revenues appropriated by general law.

(c) No County or municipality, except as provided in this subsection, shall be required to provide any funding for the state courts system, state attorney's office, public defender's office's, court-appointed counsel for Offices of the Clerks of the Circuit and County courts

performing court-related functions.

Counties shall be required to fund the cost of communications services, existing radio systems, existing multi-agency criminal justice information systems, and the construction or lease, maintenance, utilities, and security of facilities for the trial courts, public defender's office's, state attorney's offices, and the office's of the clerk's of Circuit and County courts performing court-related functions. Counties shall also pay reasonable and necessary salaries, costs, and expenses of the state courts system to meet local requirements as determined by general law.

(d) The judiciary shall have no power to affect appropriations.

Of particular importance to Article V, Section 14, is subsection (c) which delineates the counties responsibilities for funding requirements relative to the State Courts System, State Attorney's Offices, Public Defender's Office's, and court-appointed counsel. Specifically, funding of the County shall be limited to: communication services; existing radio systems; existing multi-agency criminal justice information systems; construction or lease, maintenance, utilities, and security of facilities; and local requirements for the State Courts System.

As indicated previously, House Bill 113A, adopted by the Legislature during the 2003 session, significantly amended Chapters 27, 29, and 938, Florida Statutes, among others. A brief summary of the bill includes:

• Delineating State and County funding responsibilities, including defining "local requirement";

• Removal of certain mandates imposed upon circuits;

- Permitting State Attorney's to prosecute ordinance violations only when ancillary to the State charge;
- Creating contingency funds to alleviate defaults in due process appropriation categories;

• Establishing a process for selecting and compensating court-appointed counsel;

• Creating a cost containment mechanism, including in Article V Indigent Services Advisory Board;

Memorandum to Board and County Administrator

Re: Implementation Legislation Mandated by Revision 7, Article V of the Florida Constitution May 14, 2004

Page 3

- Increasing the maximum allowable filing fees and service charges, and permitting Clerk's of the Court to impose these charges within these maximum amounts to fund court-related functions;
- Increasing Clerk's share of court-related revenue collected to two/thirds (2/3);
- Earmarking county fine and forfeiture funds for use by the Clerk's of the Court;
- Revising amounts of state taxes shared with local government;
- Imposing numerous court-related charges by operation of law rather than by court order;
- And creating a Clerk of the Court Operations Conference and establishing responsibilities incumbent thereto.

During the 2004 Legislative session, the Legislature adopted Senate Bill 2962, which in many respects provided supplemental legislation to House Bill 113A, and completes the framework for the transition to the full implementation to the provisions of Revision 7 to Article V of the State Constitution.

A brief summary of the bill includes:

- Authorizing the State Attorney to contract with local governments to prosecute those accused of violations of local ordinances;
- Authorizing the Public Defender to contract with local governments to defend those accused of violations of local ordinances;
- Increasing recording fees of the Clerk of the Court to fund the court-related information technology needs of the State Attorney's, Public Defender's, and Clerk's of the Court.

Importantly, Senate Bill 2962 amends Section 29.008, Florida Statutes, to provide for the following:

- Requiring the counties to provide Guardian Ad Litem office space and related expenses;
- Adds "a pertinent equipment and furnishings" to the definition of facility;
- Adds housing for "legal material for use by the general public" to the definition of facility;
- Requires the transfer of equipment and furnishings that will not be funded by the counties to the State of Florida;
- Requires legal aid programs be funded by the counties as a local requirement at fiscal year 02/03 levels;
- Creates Section 939.185, Florida Statutes, authorizing a Board of County Commissioners to adopt by ordinance mandatory court costs of up to \$65 on those who plead guilty or nolo contendere, or are found guilty of a felony, misdemeanor, or criminal traffic offense. Funds generated as a result thereof are to be used in the following manner:
 - O Twenty-five percent (25%) to be used to supplement State funding requirements, or pay for local requirements;
 - o Twenty-five percent (25%) to be used to fund legal aid programs;

Attachment Page _____ of ____

Memorandum to Board and County Administrator

Re: Implementation Legislation Mandated by Revision 7, Article V of the Florida Constitution May 14, 2004

Page 4

- o Twenty-five percent (25%) to be used to fund a law library personnel and materials;
- o Twenty-five percent (25%) to be used to fund teen court, juvenile assessment centers or other juvenile programs.

Lastly, the provisions of Senate Bill 2962 require county cash balances of July 1, 2004, which are dedicated to specific court programs to be used on those programs until depleted. Further, certain due process expenses, consisting of expert witness fees, court reporter fees, interpreters, mental health evaluators, etc., and appointed counsel expenses, must be paid by counties, if services were rendered prior to July 1, 2004; counties are also required to pay for all counsel fees for those paid on a flat rate, per case contract, if appointed prior to July 1, 2004, regardless of when the case is concluded; and lastly, counties are required to pay for all services rendered prior to July 1, 2004, for counsel paid under hourly contracts, and are required to forward copies of all bills to the JAC or appropriate state agency for payment of the balance of any expenses incurred after June 30, 2004. As the Board is aware, Leon County presently contracts with several service providers for providing conflict attorney services on a flat rate, per case basis. However, when the Board renewed each such contract prior to October 1, 2003, the County amended the contract to provide for an automatic termination on June 30, 2004.

Many significant issues remain to be resolved concerning implementation of the Legislation adopted pursuant to Revision 7 of Article V of the State Constitution. As these matters arise we will continue to update the Board. In the meantime should you have any questions please contact our office at your earliest convenience.

Board of County Commissioners Budget Discussion Item

Date of Meeting:

June 8, 2004

Date Submitted:

June 2, 2004

To:

Honorable Chairman and Members of the Board

From:

Parwez Alam, County Administrator

Gary W. Johnson, Director, Growth and Environmental Management

Subject

Funding Issues for Growth and Environmental Management Concerning

the Permitting Level of Service and Special Project Assignments

Statement of Issue:

This item considers reducing the current level of permitting functions and special project assignments conducted by Growth and Environmental Management (GEM) in order to meet the current staff resources available under the current funding scheme for the 121-Growth Management Fund (GMF), or maintaining the current level of services and providing additional revenue to enable the GEM to procure four additional staff needed to meet the current workload demand.

Background:

During the FY 05 Executive Budget Hearing process, GEM staff was directed to look at areas of the current permitting process that could be streamlined or eliminated in order to improve the time frame in which development orders or permits could be issued by the Department. Staff was instructed to bring ideas for Board consideration regarding where GEM could reduce the level of services to streamline the permitting process, rather than increasing staffing levels to meet the current workload demand, or provide for an enhanced level of service.

In an attempt to strike a balance to foster economic development, the following information is presented to the Board. This information, in the form of recommendations, could save from 6 to 8 months in permit processing time. The recommendation contained in this document would require revision to regulations that would provide protection to the environment and provide a user friendly permitting process.

The Board and GEM staff have grappled over the past several years with how to provide regulatory services mandated by Florida Statutes, the County Code of Laws and the Comprehensive Plan while recouping some of the costs associated with providing these services. In addition, GEM provides many services to the community where no fees are charged. These activities include: special project requests; code compliance; silviculture reviews; monitoring and facilitating Board appointed citizen groups and Boards, such as the GEM Citizens User Group, the Science Advisory Committee, the Board of Adjustment and Appeals, etc.; and generalized customer assistance through the Duty Officer System, as opposed to activities associated with processing building, development or environmental permit applications. Some of the special projects performed by GEM include: code revisions, the Bradfordville watershed and design standards, and contract management for grant

Page 2

projects, such as the Woodville recharge groundwater study, and Upper Lake Lafayette. A list of special projects that GEM has completed, a list that shows pending special projects, and committee responsibilities are shown as Attachment # 1.

The Board has previously directed that the 121-GMF recoup 55 percent of its operating costs through fees with the remaining 45% coming from general revenue. The Board approved fee increases that became effective in October 2002 that allowed the 121-GMF to meet these objectives. Over the past two years, increases in health insurance costs, and indirect costs associated with risk management and MIS, have caused the fund to struggle to meet the Board mandated split since permitting revenue is not keeping pace with increases to these operating costs. Estimates indicate that these factors, in conjunction with special project assignments have caused the staff time associated with fee and nonfee related activity to invert from the 55/45 directed split to a 45/55 fee/non fee split. This has caused staff ordinarily assigned to permitting to have to focus more on special projects, and other non-fee related activities, rather than focusing on the permitting process.

In addition, GEM staff has done an initial comparison of the land use and environmental code requirements of adjacent county jurisdictions. The comparison is shown as Attachment # 2. The results indicate that Leon County has a more detailed and comprehensive review process than these neighboring counties. One of the primary differences is that smaller counties rely on the Florida Department of Environmental Protection or the governing Water Management District for stormwater permitting. The population levels in these counties do not appear to have reached the levels where more detailed land use regulations are normally found; however, Gadsden County appears to be a local county where the levels of land use regulations are increasing as the population and development levels rise.

Also in response to the demands of the citizenry of Leon County, the Board has approved several ordinances over the past year which staff prepared, and now has to implement. Some of these ordinances include: the Special Exception Ordinance; the Temporary Use Ordinance; the Bradfordville Rural Road Designation Ordinance; the Lot Mowing Ordinance; the Redevelopment Ordinance; and the Cultural Resource Protection Ordinance. These ordinances were drafted, and are being implemented with existing staff resources. Generally, new ordinances increase the detail and level of review for project applications, and may increase the inspection workload of the organization. The results are often that the existing permitting and code compliance workload may take longer to resolve.

Analysis

I. OVERVIEW

Current revenue projections for the 121-GMF indicate that the fund will collect approximately \$1,640,813 in fee revenue for FY 05. This would require the fund to use up approximately \$389,320 of its accumulated fund balance to achieve the directed 55/45 percent split, and would keep staffing and services at the current level. In order to meet current workload demands GEM is requesting

Page 3

four new positions. One environmental engineer to assist with the permitting workload; one code compliance supervisor to enhance public education and to implement the new lot mowing ordinance; and two environmental review specialist, a biologist and a permit reviewer, to allow the expediting of Natural Features Inventory and Environmental Analysis reviews during the permitting process.

If three of these positions were approved in the budget, the 121-GMF would have to use \$569,587 of its estimated \$983,811 year end fund balance if the amount of general revenue provided to the fund is not increased.

To review the current fee schedule and the current fee and non-fee related workloads, GEM has requested an updated service cost analysis in the FY 05 budget request for both the 121-GMF and the 120-Building Enterprise Fund. In the mean time, the Board needs to consider whether to provide additional revenue to the 121-GMF to handle special project assignments, and provide for an enhanced level of expedited permitting under the current review system, or consider reducing the level of permitting services by modifying the permitting process to reduce or eliminate certain process steps. This should allow the amount of general revenue provided to the 121-GMF to stay within Board directed levels. This decrease in some services could also allow the Department to focus on issuing permits more expeditiously, but could also allow for a reduction in the level of review for land development proposals and associated permits.

Areas to consider reducing services include: notices of intent for silviculture (no fee is currently charged), single family residential environmental permitting, permitted use verifications, preapplication conferences, and reducing the requirements for applying for some environmental permits.

Given the comprehensive and complicated nature of the items to be considered, further analysis is needed regarding the effects of making any of these changes, after the Board considers the issues and provides direction to staff. Any process modification would need to be reviewed to ensure that a sound implementation strategy is established so the public and Department clientele could be informed regarding any procedural changes and notified of an effective date when such changes would go into effect. This would include involving Departments, Boards, and Commissions affected by these changes such as: the Planning Department, the Planning Commission, the Leon County Public Works Department, and the County Attorney's Office.

Further discussion of reducing the workload of GEM in order to streamline the permitting process and stay within the current 55/45 percent funding split is discussed below.

Page 4

II. WORKLOAD AND STREAMLINING CONSIDERATIONS

For the Boards consideration, staff has outlined several land use review and environmental permitting areas that could be streamlined or eliminated. These areas include:

- A. Modifying the Permitting Process by Reallocating Existing Resources
- 1. Eliminating Permitted Use Verifications (PUVs)

2. Having GEM conduct in-house Natural Feature Inventories (NFIs) for development applications

- 3. Eliminate the Singe Family Environmental Permitting Requirements for Homes Being Built in Public Subdivisions permitted after February 1996, to Allow for the Reallocation of Staff Resources to Conduct In-house NFIs
- 4. Eliminating Pre-Application Meetings

5. Allow Administrative Approval for Type B Site Plans

- 6. Eliminate the step of taking Planned Unit Developments (PUDs) to the Planning Commission
- 7. Combine the Environmental Impact Analysis (EIA) and the Environmental Permitting Requirements (EMP) in the Site Plan approval process
- B. <u>Eliminating Certain Permitting Reviews and Oversights</u>
- 1. Eliminate Silviculture Review
- 2. Acquiesce the local requirement to protect cultural resources to the State of Florida
- C. Implement the "Gold Card" Permitting Program
- D. <u>Eliminate Some Special Projects Assigned to GEM</u>
- E. <u>Increasing Staff Resources</u>

A complete list of the permitting services that GEM provides, and proposed adjustments to these services are shown in Attachment #3. Adopting any of the above streamlining ideas could involve revising the Land Development Regulations and/or the Comprehensive Plan. These options are being brought forth for Board consideration, and there is not complete agreement by GEM management concerning these options.

Page 5

A. Modifying the Permitting Process by Reallocating Existing Resources

One consideration for reducing the workload at GEM is to streamline the permitting process by having the Department conduct some of the initial site work for projects. For example, the Department could conduct the Natural Features Inventory (NFI). In addition, the Board could consider reducing certain permitting requirements, and eliminate some steps to the process all together. An effect of this streamlined process could be a reduced level of public notice. If the Department has the ability to perform the NFI it will know what environmental features need to be protected through the permitting process.

1. Eliminating Permitted Use Verifications

Before any project can proceed into the site plan process a Permitted Use Verification (PUV), a Natural Features Inventory, and in most cases a Pre-Application meeting must be done. A streamlined process would involve eliminating the PUV, conducting the NFIs in-house, and eliminating the pre-application conference part of the process. Currently, it takes seven to ten working days to process a PUV. This part of the process could be eliminated thus reducing the initial part of the development process by up to three weeks. The estimated fee revenue reduction would be \$30,900.

A consequence of removing the PUV from the development process would be the removal of the Board directed public notice that currently occurs during this early stage of the process. It should also be noted that the elimination of pre-submittal review and determinations (PUVs) and meeting with staff by potential applicants, may increase the number of re-submittals during the site plan and environmental review process. Therefore, the resulting overall timeframes for receiving development approval and final permitting may not be reduced by a significant amount.

Also, the Board's current direction to staff regarding public notification is that it should occur as soon as possible during the development review process. This is reflected in the current Board's direction regarding the public notification of issued PUVs and scheduled pre-application meetings. This proposed option if implemented would significantly delay the public notification process, and therefore, would potentially reduce the public's ability to influence the design of proposed development projects because the notification would be occurring subsequent to the submittal of a finalized site plan application.

2. Having GEM conduct in-house Natural Feature Inventories (NFIs) for development applications

The next step in the process is the NFI. The NFI sets the stage for how a site can be developed, what environmental features need to be set aside, and how impacts to these features are mitigated. Once the NFI features are delineated and properly documented, the rest of the review and approval process can proceed through Site Plan Review unimpeded by unresolved or conditional NFI approvals. The current process involves a consultant providing an NFI to the Department for review and Department staff responding to the consultant regarding the adequacy of the response. Department records for

Page 6

FY 04 indicate that an NFI application takes on average 61 calendar days to approve, with one additional information request per application. On average an application is with the Department for 23 days and the applicant 38 days.

To streamline this process the Department proposes that staff conduct the Natural Features Inventory for owners who want to develop property. Environmental Compliance staff would streamline the NFI process by limiting the NFI to an inventory of site features by conducting a site visit, referencing the observed against the available GIS environmental overlays, and compiling a report. Specifics concerning the analysis such as the exact floodplain elevation or determining whether a karst feature is active or not would be moved to the Environmental Impact Analysis portion of the review process.

If GEM staff conducts the analysis, this would eliminate the back and forth between the Department and the consultant and allow an NFI to be issued within three weeks. This would allow the project to move into the Site Plan process more quickly. One consequence of GEM conducting project NFIs would be a decrease in the local market demand for private consulting firms who do NFIs. It is estimated that the NFI fee will produce approximately \$274,368 a year.

3. Eliminate the Single Family Environmental Permitting Requirements for Homes Being Built in Public Subdivisions permitted after February 1996, to Allow for the Reallocation of Staff Resources to Conduct In-house NFIs.

In the short term the Department could recoup the costs of conducting the NFIs by realigning existing staff resources until the updated service cost analysis is done and a fee set accordingly. This would involve reducing the single family residential permitting, as stated above, that is currently done by the Environmental Compliance Specialists within the Environmental Compliance Division, and having them conduct the NFIs under the auspices of the Environmental Review Specialists/Biologists. The estimated fee revenue that would be lost by entirely eliminating the single family environmental permitting process is \$225,000. Since the majority of single family permitting occurs on lots created after February 1996, the loss in revenue would be close to this amount. In order to off-set existing revenue loss for the PUVs, environmental permitting of single family home, and pre-application conferences, staff estimates that the average NFI could be conducted for approximately \$4000. Board approval would be needed to establish an appropriate NFI fee if this concept is approved. There will be no additional cost to the applicant if GEM is payed to conduct the NFI, since they are currently paying a private consultant to conduct the NFI.

4. Eliminating Pre-Application Meetings

Staff could conduct the NFIs and provide the approved documents and maps to the applicant. If the applicant agrees with the Department's NFI, he or she could move directly into the Site Plan Technical Review Process. If the NFI is locked down, Development Services staff believes that the project could proceed into the Site Plan portion of the process which would eliminate the need for a pre-application conference. Eliminating the pre-application conference would reduce fee revenues by an estimated \$18,500. Presently, application for a pre-application conference triggers the first public notice to adjacent property owners. An effect of removing the pre-application conference from the process would be a reduction in public notice during the early stage of the development process.

Page 7

Eliminating the PUV, conducting the NFI in-house and eliminating the pre-application conference could remove an estimated nine weeks from the beginning of the development application review cycle.

5. Allow Administrative Approval of Type B Site Plans

Currently Type B Site Plans must go to the Development Review Committee before they can complete the Site Plan process. This adds an additional two weeks onto the site plan process after the application has been reviewed and deemed sufficient by technical review staff. Since the majority of the GEM Site Plan Workload is Type A and B Site Plans, the Board may wish to consider allowing Type B projects to go through the same process as Type A Site Plans, and have the Development Services Director sign off on the final approved Type B Site Plan. This would allow a minimum of two weeks to be saved during the process, and would also limit the duties of the DRC to reviewing Type C projects before they went to the Board for final approval. Allowing the Type B Site Plan to be administratively approved would make Leon County's process similar to the majority of the County's in the state. Currently, pubic notice through mailings does not occur during the technical review portion of the process. The effect of providing pubic notice during the technical review stage to the development process would need to be evaluated.

6. Eliminate the step of taking Planned Unit Developments (PUDs) to the Planning Commission

Another area for the Board to consider streamlining is by-passing the Planning Commission for PUD approvals. Currently, PUDs must be publicly noticed and go before the Planning Commission before they are scheduled for consideration by the Board. If PUDs went from the staff analysis directly to the Board for consideration, a minimum of four weeks would be saved in the process. The time savings would be due to the removal of a public notice cycle before the Planning Commission, and bypassing the Planning Commissions normally scheduled meetings. This would also reduce the costs to the applicant of having to publicly notice the PUD for the Planning Commission.

7. Combine the Environmental Impact Analysis (EIA) and the Environmental Permitting Requirements (EMP) in the Site Plan approval process

Staff also proposes combining the Environmental Impact Analysis (EIA) and Environmental Management Permit (EMP) process. This process would be done concurrently with the Site Plan Review so when a project received Site Plan Approval from the appropriate approving authority, all the required permits required for site clearing would be issued. Combining the EIA and EMP together and having this approval as part of the Site Plan process has the potential to make the up front engineering and application costs higher for the project owner. Specifically, the applicant would be required to provide construction detail plans for Site Plan approval, but this would allow them to execute their project more quickly. This could potentially reduce the current sequential review process, where by environmental permits are reviewed after site plan approval, up to 18 weeks. Conversely, the site plan process could be prolonged if stormwater permitting issues could not be resolved quickly between the applicant's consultant and GEM.

Page 8

Eliminating Certain Permitting Reviews and Oversights

1. Reducing the level of Silviculture Review

On average GEM reviews twenty notices of intent to perform silviculture per year. The Department does not collect a fee for the review or inspection services provided to the community for this service. Reducing the code provisions that require an owner to notice the Department for silviculture activities would free the Environmental Review Specialist assigned this function to review more environmental permit applications where fees are paid. In essence, the Department would only consider property that is agriculturally exempt as designated by the Property Appraiser's Office for notice. All other proposed silviculture projects would go through a short form permitting review.

2. Acquiesce the Local Requirement to Protect Cultural Resources to the State of Florida

During the NFI process GEM requires an NFI applicant to provide documentation from the State of Florida that determines whether there are cultural resources located on or adjacent to a parcel of land under consideration for development. The Board may want to consider eliminating this provision of the Land Use Regulations and defaulting such oversight to the state. It should be noted that due to staffing levels at the state and federal levels that any oversight would be extremely limited. Presently, staff advises the applicant during the PUV or NFI stage of the process to contact the State of Florida, Department of State to provide GEM documentation concerning the cultural resource status of a proposed development site. The complete effects of acquiescing the cultural resource program to the State of Florida would have to be studied before this would be recommended by staff.

C. The "Gold Card" Permitting Program

Two items previously considered by the Board at the March and July 2000 workshops under the banner of the "Gold Card" Program are presented below.

1. The "Leon County Certified Quality Development" Program

The "Leon County Certified Quality Development" concept was a new and innovative way to encourage developers to go above and beyond current code requirements. Generally, this type of approach is a two-part concept that includes commitments and benefits in the equation, with the goal of the process to make sure that the equation balances. The program offers incentives and benefits to the developer by offering a way to expedite the site plan process, while at the same time giving a higher level of environmental protection that enhances the overall environmental quality of the project. Finally, the voluntary aspects of the program recognize the need for flexibility based on customer needs. This program was adopted by the Board, and added to the Land Development Regulations as Article XIX in March 2001. To date there has not been an application submitted under the quality development label.

It is unclear why potential applicants have not utilized the "quality development" track, especially as a vehicle for reducing overall approval time frames. The reluctance may be merely related to the uncertainty associated with being the first to undertake a new process, especially in view of the commitments that the applicant is required to make under the program. Subsequent to completion

of the first "quality development," it is anticipate that the program can and will provide a positive benefit to both participants and the County. It is recommended that staff in conjunction with Board activity encourage the utilization of the program in the future by applicants with proposed development's that would appear to comply with the program's requirements.

2. The "Leon County Certified Quality Design Professional" Program

Another component of a streamlining effort would allow some developers and consultants opportunities to certify that certain aspects of their projects meet code requirements and allow them to bond the improvements. This would allow the project to proceed into the construction phase more quickly. Any code deficiencies could be caught during the inspection process, and addressed before a final certificate of occupancy is issued.

The introduction of the "Quality Design Professional" was provided as a new concept as a new way to encourage design professionals to assist staff in improving the site plan and environmental permitting process through a cooperative effort. This concept utilized the current informal business practices which facilitate the process for those individuals which are more familiar with our rules and practices. Staff identified a few design professionals that provided quality submittals each and every time they submitted applications. The Department anticipated implementing and education and training program for consultant interested being a "Certified Quality Design Professional" to train consultants on the nuance of the professional would allow applications to by-pass certain steps in the approval process such as preapplications in anticipation of there being substantially complete site plan and permit applications, and fewer requests for additional information. At the time, this idea was perceived by the Board as possibly being biased or discriminatory toward certain consultants, and was not adopted.

D. <u>Eliminate Some Special Projects Assigned to GEM</u>

In order for staff to focus more time on the permitting of development and permit applications, consideration should be given to reducing or eliminating special projects that do not involve permitting or the Land Development Regulations. Staff estimates that at least 55 percent of the Departments resources are spent on special projects or other non fee related activities such as code enforcement. Most special projects are assigned by County Administration via the Board, and determined to be of significant impact to the citizens of Leon County. Therefore it has been difficult to recommend eliminating special projects. Based on the impact on the workload of the Department, consideration should be given to eliminating Special Project numbers 1, 2, 3, 20, 22, 30, 45, 46, 47, and 48 as listed on the Special Projects Ongoing list on Attachment #1 pages 1 and 2 of 4. Staff is not recommending the elimination of any committee assignments provided in the Committee Responsibility list on Attachment #1 page 4 of 4.

E. <u>Leave the Current Process in Place and Provide Additional Resources to Expedite the Process</u>

If the Commission wants to maintain the same level of service, the Board may want to consider increasing staffing as requested by GEM in the FY 05 budget cycle so permits can be expedited through the process. The effect would be for the Board to have to increase the amount of general revenue provided to the 121-GMF.

III. CONCLUSION

For the FY 05 budget cycle the Board can consider whether GEM needs to reduce certain permitting services in order for the 121-GMF to stay within the Board directed 55/45 revenue split. The reduction of services such as the elimination of PUVs, single family environmental permitting and pre-application conferences would allow GEM to realign staff resources to focus on conducting NFIs for development projects. This one step would allow proposed projects into the Site Plan process with many of the environmental issues addressed. Staff would then be prepared to conduct environmental permitting review during the Site Plan process. All development permits would be ready to issue once a Site Plan had been approved. In addition, if Type B Site Plan applications could be approved by the Development Services Director as with Type A Site Plans, the majority of the Site Plans submitted to GEM for approval could be approved administratively.

As previously reference, given the comprehensive and complicated nature of the items to be considered, further analysis is needed regarding the effects of making any of these changes, after the Board considers the issues and provides direction to staff. Any process modification would need to be reviewed to ensure that a sound implementation strategy is established so the public and Department clientele could be informed regarding any procedural changes and notified of an effective date when such changes would go into effect. This would include involving Departments, Boards, and Commissions affected by these changes such as: the Planning Department, the Planning Commission, the Leon County Public Works Department, and the County Attorney's Office.

Conversely, consideration should be given to providing services at current level which would require additional staff and an appropriation of general revenue accordingly. If the Board wants to provide for expedited permitting, and continue to provide the citizens of Leon County the current service level they receive from GEM, then some or all of the four new positions that GEM has requested would need to be placed in the 121-GMF budget.

The service cost analysis that GEM is for permitting functions are adequate. In addition, the analysis will show the percentage of time GEM spends on fee and non-fee related activities. This will allow County Administration and the Board to determine if the amount of general revenue provided for the 121-GMF is adequate for the amount of non-fee related services and special projects assignments that the Department performs.

Implementing any of the changes as outlined above will have an impact on the amount of revenue that GEM collects from fee related activities. If some processes are eliminated that corresponding fees would not be collected. Initial staff estimates indicate that revenues would be reduced by

Page 11

approximately \$274,400. To keep the 121-GMF at the currently directed 55/45 split, fees collected for conducting NFIs in-house could off-set this initial loss in revenue. If the proposed service cost analysis is approved for the 121-GMF all GEM fees could be adjusted to reflect their true market costs. The analysis would also show what amount of general revenue should be provided to the 121-GMF to support non-fee related activities.

Implementing any of these changes will likely reduce the length of time it takes the Department to issue a development order or permit. Eliminating the PUV and pre-application portions of the process and having GEM staff conduct the NFI has the potential to shave nine weeks of the initial stages of the Development process. In addition, combining the EIA and EMP applications during the Site Plan portion of the process has the potential to reduce this portion of the process by an estimated eighteen weeks if the applications are sufficiently complete when they are submitted to the Department for review. Together the time savings for the preliminary stages of the review process, combined with the environmental review modifications, total an estimated six to seven months that can be saved on the average development project if all the changes proposed are instituted. Almost eight months could be saved if the project were a Type B Site Plan or a PUD.

The following table (Table 1) summarizes the estimated time that would be saved during the permitting process if all the changes enumerated above were adopted by the Board.

Table 1

Permit Process Step	Estimated Review Time Saved
Permitted Use Verification (PUV)	2 weeks
Natural Features Inventory (NFI)	5 weeks
Pre-Application Meeting	2 weeks
Environmental Permit at Site Plan	18 weeks
Sub Total	27 weeks (6.75 Months)
Administrative Approval of Type B Site Ple	ans 2 weeks
No Planning Commission Review for Plan Unit Developments	ned 4 weeks
Total	33 Weeks (8.25 months)

To reiterate, given the comprehensive and complicated nature of the items to be considered, further analysis is needed regarding the effects of making any of these changes, after the Board considers the issues and provides direction to staff. Any process modification would need to be reviewed to ensure that a sound implementation strategy is established so the public and Department clientele could be informed regarding any procedural changes and notified of an effective date when such changes would go into effect. This would include involving Departments, Boards, and Commissions affected by these changes such as: the Planning

Page 12

Department, the Planning Commission, the Leon County Public Works Department, and the County Attorney's Office.

Furthermore, there is a need to review the Environmental Management Act to revise provisions that prolong the permitting process. This would be a long term project that would take staff several months to accomplish before a revised EMA could be presented to the Board. The objective of this task would be to simplify and clarify the permitting process to make it more user friendly.

To conclude, many of the possible process changes outlined in this report are contrary to past Board direction. In light of the community interest to significantly reduce the time it takes to obtain a development approval or associated permit, these suggestions could save from six to eight months from the current time frames. Many economic development analyses done in Leon County have identified the permitting process as one of several detriments to economic growth in the community. To address these concerns, staff offers the aforementioned process changes for consideration.

Options:

- Direct staff to further explore and make recommendations concerning all of the proposed options as outlined in options A through E of the analysis section and amend the Land Development Regulations as necessary to achieve a streamlined process, and continue to provide general revenue to the 121-Growth Management Fund at the directed 55/45 split.
- 2. Do not direct staff to implement any of the proposed options as outlined in sections A through E of the analysis section and do not amend the Land Development Regulations, and provide additional general revenue to the 121-Growth Management Fund to acquire all or some of the new positions requested in the FY 05 budget process.
- 3. Board Direction

Recommendation:

Special Projects Ongoing Growth and Environmental Management

1. Pursue feasibility of Implementing a Joint Leon County/Wakulla County Water Bottling Facility

2. Research and bring back information on alum injection treatment.

- 3. Investigate entering into a developer agreement and accepting 95+ acres for environmental conservation for a property off Crump Road.
- 4. Volume control regulations-conduct meetings with GEM Citizens User Group, SAC, TBA and EDC and bring back to Board.
- 5. Lake Lafayette ordinance revisions to adopt a SDZ for tributary and waterbody buffers.

6. Project management for Lake Lafayette water quality study.

7. Project management for the Woodville recharge aquifer protection study.

8. Ordinance revisions for significant slopes.

- Regional stormwater regulations.
- 10. Meetings on the proposed Tired Creek Dam in Georgia and effects on Ochlockonee River.
- 11. Proposed Decatur County Landfill and effects on Lake Talquin.
- 12. Ordinance revisions for the Fred George SDZ.
- 13. Ordinance revisions for the building elevations in floodplains.
- 14. Analysis of large lot subdivisions meeting the Bradfordville Stormwater Standards.
- 15. Project management of ERD contract to analyze Pond #4 as part of the Lake McBride HOA settlement agreement.
- 16. Fallschase-review of development proposals, litigation, code violations
- 17. Habitat for listed species- review code and provide consistency with Comp Plan
- 18. Project management of the Leon County Water Quality Monitoring Contract for sampling 38 locations in lakes and rivers (McGlynn Contract)
- 19. Meetings and reporting on Proposed Routes for the City of Tallahassee Eastern Transmission Line.
- 20. Workshop on Siliviculture
- 21. Amendments to LDC pertaining to aquifer protection
- 22. Native forest and high quality successional forest regulations
- 23. Lake Jackson Ecopassage Technical Review
- 24. Science Advisory Committee meetings
- 25. Lake Lafayette Partnership meetings for Total Maximum Daily Load (TMDL) program.
- 26. Comprehensive stormwater project list
- 27. Numerous code violation cases, preparation for Code Board and administrative hearings
- 28. Expert witness for the Killearn Lakes Septic Tank Appeals Lawsuit
- 29. Technical support to the County Attorney's Office for two trials involving environmental permitting litigation.
- 30. Ordinance to convey development rights to County for 10+ years to realize reduced property taxes
- 31. Walmart/Sam's Club redevelopment analyses and meetings
- 32. Mahan Corridor Study (RFP development, consultant selection, assistance with public meetings, finalization of proposed future land use pattern and associated development standards along corridor, and providing traffic information and analysis with Planning and Public Works staff). Presently developing new zoning districts and design standards that will be used to implement the Study that has been adopted by the Board.
- 33. Assisting Planning staff with Oak Ridge, Lake Bradford, and Southside Sector Plans development including provisions of land use, code enforcement, transportation data and analysis, and assistance with public meetings.
- 34. Fee-in-lieu of Sidewalk Installation Ordinance development with County Attorney's Office, Planning and Public Works.
- 35. Sunsetting of vested development rights ordinance development to assist with further implementation of the "10-year traffic concurrency" provisions.
- 36. Serving as the County Growth Management Department's represent of the Leon County School Board's site selection committee.
- 37. Assisting Planning staff with specific Comprehensive Plan language to provide for conservation subdivisions.

Special Projects Completed Growth and Environmental Management

- 1. Apalachicola National Forest road improvements policy.
- 2. Lauder property purchase and development agreement.
- 3. Amendments to the LDC pertaining to stormwater volume control.
- 4. CeRCA lawsuit resolution.
- 5. Research on the effects of color on cell tower lights on migratory bird mortality rates.
- 6. Killearn Lakes Units I & II, stormwater and septic system problems.
- 7. Report on 700 acre Chason property south of Oakridge Road.
- 8. Regional stormwater facilities research and planning.
- 9. Seminole Raceway site and development plan approval challenge in administrative hearing.
- 10. Amendments to the LDC pertaining to redevelopment.
- 11. Amendments to the LDC pertaining to protection of cultural resources.
- 12. Ochlockonee River water quality and volume issues (County vs. Georgia).
- 13. Tired Creek Dam meetings and research.
- 14. FallsChase meetings to resolve development in the floodplain.
- 15. Weimar property flooding controversy.
- 16. Alford Park Greenway acquisition.
- 17. Comprehensive plan amendments pertaining to significant slopes.
- 18. Miley Miers property acquisition.
- 19. Tharpe St. Corridor request for proposal.
- 20. Consultant selection process for Lake Jackson Ecopassage Feasibility Study.
- 21. Stormwater modeling for Thomasville Road/Bradfordville SWMF No.4.
- 22. Baker Place wetland delineation & floodplain assessment.
- 23. Lake Lafayette SDZ Technical Review Committee meetings and research.
- 24. ESA committee meetings
- 25. Developed the Bradfordville Site and Building Design Standards Guidelines Manual
- 26. Completed Woodville Rural Community site-specific re-zoning initiative.
- 27. Developed the Leon County Quality Development Program.
- 28. Revisions to the County's Manufactured Housing Ordinance
- 29. Revisions to the County's Temporary Use and Home Occupation Ordinances
- 30. Developed the Special Exception Ordinance
- 31. Assisted Public Works and County Attorney's Office in the development of the Bradfordville Rural Road Ordinance
- 32. Developed a new sign ordinance
- 33. Assisted Planning staff with the development of the new Neighborhood Boundary zoning district to implement the new Comprehensive Plan provisions that address the transition from Residential Preservation to nonresidential land uses.
- 34. Assisted the Environmental Compliance staff with the development of a major glitch revision to the EMA with specific emphasis on the related Policy 2.1.9 subdivision approval process, exempt subdivisions, and limited partition subdivision review as they are related to the demonstration of environmental compliance.
- 35. Served on the Planning Commission's Comprehensive Reform Committee, assisted with the selection of a consultant to assist the Planning Commission in developing its recommendation to the BCC and City Commission regarding Comprehensive Plan reform.
- 36. Developed a new Lot Mowing Ordinance
- 37. Drafted Comprehensive Plan Amendment and completed support transportation merely for 10year concurrency exempt area for Capital Circle N.W.

Special Projects Ongoing Growth and Environmental Management (Continued)

- 38. Assisting Planning with State mandated inter-local agreement with the Leon County School Board to coordinate future school siting and capacity issues.
- 39. Serving on the Chamber of Commerce/Builders Association Regulatory Reform Subcommittee reviewing regulation and providing recommendations for regulatory reform.
- 40. Working with Planning staff to development LDRs to implement the active and passive recreation provisions recently added to the Comprehensive Plan.
- 41. Assisting CUTR (Center for Urban Transportation Research) initiative specifically the development of regulations to protect roadway corridor that are planned for capacity improvements.
- 42. Working with the County Attorney's Offide on the appeal of the proposed N.G. Wade amendment to the Wakulla County Comprehensive Plan.
- 43. Providing ongoing technical support to the County Attorney's Office on various land use and transportation impact analysis related issues in support of various legal cases in the County, specifically in (but not limited to) the Bradfordville area.
- 44. Development of a criteria list to use as a guide to remove old outstanding liens on cases when the property is in compliance.
- 45. Development of a proposed Intrusive Lighting Ordinance
- 46. Revisions to the public notice requirements to expand the radius notification
- 47. Drafting ordinance language to address setbacks from existing and proposed natural gas lines and related high pressure gate structures
- 48. Drafting ordinance language to address high voltage transmission line siting
- 49. Watershed Protection Initiative

		permitting office.	removal is regulated.	
Impact Fees	No	No	No	Yes

The primary differences between Leon County and the adjacent County jurisdictions are:

- The formal PUV process.
- The requirements for a formal NFI and EIA.
- The reliance on DEP, or in the case of the eastern half of Jefferson County, the Suwannee River Water Management District, to do the formal stormwater permitting. Gadsden and Wakulla County conduct some level of flood control review by looking at the pre and post stormwater runoff for the 25-year 24 hour storm event.
